Against Automation Mythologies J. Jesse Ramirez, 2020-06-02 Inspired by Roland Barthes's practice of semiotics in Mythologies this book offers a technoclasm a cultural critique of US narratives discourses images and objects that have transformed the politics of automation into statements of fact about the rise of the robots Treating automation as an

ensemble of technologies and science fictions this book foregrounds automation's ideologies, exaggerations, failures, and mystifications of the social value of human labor in order to question accepted and prolific automation mythologies. Jesse Ramirez offers a study of automation that recognizes automation as a technosocial project that uses the tools of cultural studies and history to investigate the narratives and ideologies that often implicitly frame the automation debate and that concretely and soberly assesses the technologies that have made the headlines. The case studies featured include some of the most widely cited and celebrated automatic technologies such as the Baxter industrial robot, the self-driving car, and the Watson AI system. Piloting Palm Andrea Butter, David Pogue, 2002-02-18

The definitive behind-the-scenes story of the visionary team that launched the handheld industry. Palm insider Andrea Butter and New York Times columnist David Pogue, with full exclusive cooperation of the company's founders and more than fifty key Palm and Handspring executives, tell the riveting tale of the start of an industry constantly in the headlines. The origins of this volatile industry began with the tiny team who beat staggering odds to turn the PalmPilot into a billion-dollar market and later took their ultimate vision to Handspring, now Palm's most powerful rival. Many of today's current events relating to the competition in this industry are forecasted in this important business drama. The authors take an unprecedented look at how the visionary founders of the industry led one of the most successful startups in history to succeed against all odds, including a shoestring budget, shortsighted corporate partners, and competition from Microsoft. The roller coaster ride is full of insight into the bungles of venture capitalists, the allure and pitfalls of partnerships with giant corporations, and the steely determination needed to maintain entrepreneurial and visionary independence. With gripping accounts of the last-minute crises that almost torpedoed the PalmPilot on the eve of its unveiling and the triumphant, unprecedented reception of Palm in the marketplace, as well as the glimpses into the future of this industry, this book is as entertaining as it is instructional. Key revelations include:

- The principles of business, economy, and product design that led Palm to succeed where billion-dollar corporations like Apple, Motorola, and Casio had failed.
- Important moments in technological development of the handheld, such as the secret Easter egg, a software surprise planted in the Palm software that nearly sank launch plans.
- Unique insight into the showdown with Microsoft and 3Com's tragic decision not to make Palm independent, that led Palm's founder Jeff Hanawkins and CEO Donna Dubinsky to take their vision elsewhere.
- The ongoing competition between Palm and Handspring.
- The new rivals to contend with, including Sony.

Corporate Social Capital and Liability Roger Th.A.J. Leenders, Shaul M. Gabbay, 2013-03-09 In studies of inter organizational relations IORs there is a tendency to look at dyads of firms and to consider networks as aggregates of such dyads But there are several roles for a third party a go between This chapter looks at a go between not in the sense of a middleman who intermediates in existing production or trade such as an agent wholesaler retailer and not in the sense of an entrepreneur who intermediates in the realization of new potential in connecting supply and demand It looks at a go between in the sense of a relationship counsellor for the development and maintenance of social capital providing support in setting up adapting and ending cooperative relations between others Or in yet different terms to help in the embedding of relations in Granovetter's 1985 sense Uzzi 1997a Such roles may be performed by middlemen or entrepreneurs but also by specialized agents who do not play a direct role in linking stages in a chain of production and distribution as middlemen and entrepreneurs typically do Indeed some of the roles require an independence that is served by not having a direct stake in the relations that need to be developed I propose that the analysis yields a perspective for looking at the roles of trade and industry associations in European business systems and of banks and trading houses in Japanese enterprise groups Kigyo Shudan
