

STATEMENT OF PURPOSE

A desire to extend my knowledge and an enthusiasm to solve the demanding problems faced by the industry today, motivated me to pursue **Master's in Networking**. I believe that my educational background has instilled in me the qualities required to meet the rigor of this demanding course, and subsequently, the profession. I bring along with me a strong grasp of fundamentals in Electronics, unique but relevant work experience, along with a desire to learn, a penchant for teamwork and leadership, and a zest for challenges.

My first biggest decision which set the path for my career was choosing Electrical Engineering as my field of study even though my parents were against it. Being the owner of a manufacturing company in the FMCG industry; I remember the day I and my father had an argument about what I should do with my life. While he wanted me to pursue Business Management, I always had a desire to know how things work, wanted to learn by experience & yearned to solve challenging problems. Ever since the day my father brought our first television set home, I have had a peculiar interest in knowing how one could fit an entire world into such a small box. A few other insanely inquisitive questions led me to choose to study Electrical Engineering, and I still believe that it is the smartest thing I have ever done.

I am deeply inspired & motivated by my professor Dr. Rama Chandran, who is very well known in the country for his contributions to the Department of Telecommunications, Government of India., Upon his advice, I decided to pursue, and thereby developed an interest in "**Networking**" during my third year. The courses "**Computer Networks**" and "**High Speed Networks**" coupled with my summer internship at Vodafone, where I handled **Routers and Servers**, made me realize how much interested I am in "**Networking**". Consequently, I chose to specialize in Networking. My interest further aligned me to design a Bluetooth Personal Area Network for controlling and monitoring the functioning of all the devices connected to the same network. Towards this, I chose to take "**TCP/IP Networking**" and "**Network Security and Cryptography**" as part of my coursework during my fourth year. My interest in these courses reflected in my GPA, standing at 9.6 on a scale of 10 in these subjects. I also began increasing my cognizance about Computer Networks by collecting information from the internet and reading research papers which soon turned into a passion for me.

I also worked on two projects during my third year. The first was "**Bluetooth using LABView**" where I led a team of seven students. We used LABVIEW Bluetooth module to control and transfer data from one device to another by varying the quarter wave antenna length thereby increasing the range of the Bluetooth device. Although the increase in the range compared to the battery consumption was not commercially viable, we were successful in increasing the usage range of the Bluetooth device.

Based on my interest towards networking, I was placed in one of the largest telecommunication companies in my state, "**Bharat Sanchar Nigam Limited**", to undergo a very prestigious internship program which allowed me to work in the company for the entire summer. A study on the company and its products, introduced to me the importance of providing innovative solutions
