Class Size Peter Blatchford, Kam Wing Chan, Maurice Galton, Kwok Chan Lai, John Chi-Kin Lee, 2016-04-28 Much debate research and commentary about class sizes in schools is limited because of an exclusive concern with class size and pupil academic attainment and a neglect of classroom processes which might help explain class size effects or lack of them Very little is known about the central question how can teachers make the most of class size changes Much of the commentary on class size effects has focused on Western and English speaking countries but there are promising developments elsewhere particularly the Small Class Teaching initiatives in East Asia in the past decade which have brought new knowledge and practical wisdom to the class size debate This book seeks to move toward a clearer view of what we know and do not know about class size effects and to identify future steps in terms of policy and research There is a huge and exciting potential for international collaboration on knowledge concerning class size effects which can help with research informed policy The book aims to draw out Eastern and Western international contexts which underpin any understanding of the role of class size in school learning The book has chapters by an international team of experts on class size effects including Maurice Galton and John Hattie Chapters are organised into four main sections Socio cultural and political contexts to the class size debate in the East and West Research evidence on class size Class size and classroom processes likely to be related to class size changes Professional development for small class teaching in East Asia

Student/teacher Achievement Ratio (STAR) Tennessee. Project STAR, Elizabeth R. Word, 1990* **Rethinking Class Size: The complex story of impact on teaching and learning** Peter Blatchford, Anthony Russell , 2020-11-12 The debate over whether class size matters for teaching and learning is one of the most enduring and aggressive in education research Teachers often insist that small classes benefit their work But many experts argue that evidence from research shows class size has little impact on pupil outcomes so does not matter and this dominant view has informed policymaking internationally Here the lead researchers on the world s biggest study into class size effects present a counter argument Through detailed analysis of the complex relations involved in the classroom they reveal the mechanisms that support teachers experience and conclude that class size matters very much indeed Drawing on 20 years of systematic classroom observations surveys of practitioners detailed case studies and extensive reviews of research Peter Blatchford and Anthony Russell contend that common ways of researching the impact of

class size are limited and sometimes misguided While class size may have no direct effect on pupil outcomes it has they say significant force through interconnections with classroom processes In describing these connections the book opens up the everyday world of the classroom and shows that the influence of class size is everywhere It impacts on teaching grouping practices and classroom management the quality of peer relations tasks given to pupils and on the time teachers have for marking assessments and understanding the strengths and challenges for individual pupils From their analysis the authors develop a new social pedagogical model of how class size influences work and identify policy conclusions and implications for teachers and schools Resources in Education ,2001-10 **Current Issues in School Leadership** Larry W.

Hughes,2005-01-15 **Current Issues in School Leadership** examines controversies about and affecting school practices Focusing on two essential questions what is important to today s school leaders and what is interfering with schooling processes it includes chapters by a broad range of authors with expertise on their specific topic The text is organized in three sections Social and Political Issues Curriculum and Learning Issues and Organization and Management Issues The goal of this text designed for school leadership educational administration and foundations of education courses is to challenge readers to think carefully and critically about each of the issues presented leading to positive action and leadership
