Covertaction Information Bulletin ,1983 Current News ,1988 Reporting of Counterintelligence and Criminal Violations United States. Department of Defense,1987 *America the Vulnerable* Joel Brenner,2011-09-29 Now available in a new edition entitled GLASS HOUSES Privacy Secrecy and Cyber Insecurity in a Transparent World A former top level National Security Agency insider goes behind the headlines to explore America s next great battleground digital security An urgent wake up call that identifies our foes unveils their methods and charts the dire consequences for government business and individuals Shortly after 9 11 Joel Brenner entered the inner sanctum of American espionage first as the inspector general of the National Security Agency then as the head of counterintelligence for the director of national intelligence He saw at close range the battleground on which our adversaries are now attacking us cyberspace We are at the mercy of a new generation of spies who operate remotely from China the Middle East Russia even France among many other places These operatives have already shown their ability to penetrate our power plants steal our latest submarine technology rob our banks and invade the Pentagon s secret communications systems Incidents like the WikiLeaks posting of secret U S State Department cables hint at the urgency of this problem but they hardly reveal its extent or its danger Our government and corporations are a glass house all but transparent to our adversaries Counterfeit computer chips have found their way into our fighter aircraft the Chinese stole a new radar system that the navy spent billions to develop our own soldiers used intentionally corrupted thumb drives to download classified intel from laptops in Iraq And much more Dispatches from the corporate world are just as dire In 2008 hackers lifted customer files from the Royal Bank of Scotland and used them to withdraw 9 million in half an hour from ATMs in the United States Britain and Canada If that was a traditional heist it would be counted as one of the largest in history Worldwide corporations lose on average 5 million worth of intellectual property apiece annually and big companies lose many times that The structure and culture of the Internet favor spies over governments and corporations and hackers over privacy and we ve done little to alter that balance Brenner draws on his extraordinary background to show how to right this imbalance and bring to cyberspace the freedom accountability and security we expect elsewhere in our lives In *America the Vulnerable* Brenner offers a chilling and revelatory appraisal of the

new faces of war and espionage virtual battles with dangerous implications for government business and all of us Spies, Lies, and Alibis Mary Ellyn Hazen, 2003 *Spies, Lies and the War on Terror* Paul Todd, Todd Bloch argue that the bureaucracy and narrow political goals surrounding intelligence actually have the potential to increase the terrorist threat This lively and shocking account is a must read for anyone who wants to understand the new power of intelligence
