Planning Futures

Philip Allmendinger, Mark Tewdwr-Jones, 2005-06-29 Planning theory is currently in a confused state as a consequence of a number of changes over the last ten years in planning practice and social and economic theory Even prior to these events planning theory was an uncertain discipline reflecting planning's precarious position between and resting upon a range of professional subject areas and philosophical roots Planning Futures is an attempt to pin down the constantly evolving landscape of planning theory and to chart a path through this fast changing field Planning Futures is an up to date reader on planning theory but adds something more to the subject area than a mere textbook The contributors have attempted to

bridge theory and practice while putting forward new theoretical ideas By drawing upon examples from planning practice and case study scenarios the authors ensure that the work discusses planning theory within the context of present planning practice Case studies are drawn from an international arena from the UK Europe South Africa and Australia *City of Well-being* Hugh Barton,2016-11-10 *City of Well being* provides a radical and holistic introduction to the science and art of town planning It starts from the premise that the purpose of planning is the health well being and sustainable quality of life of people Drawing on current and historic examples it offers inspiration information and an integrated perspective which challenges all professions and decision makers that affect the urban environment It is both authoritative and readable designed for students practitioners politicians and civil society The science Summarizing the most recent research the book demonstrates the interrelationships between the huge issues of obesity unhealthy lifestyles inequality mental illness climate change and environmental quality The radical implications for transport housing economic social and energy policies are spelt out The art and politics The book examines how economic development really happens and how spatial decisions reinforce or undermine good intentions It searches for the creative strategies urban forms and neighbourhood designs that can marry the ideal with the real The relationship of planning and politics is tackled head on leading to conclusions about the role of planners communities and development agencies in a pluralistic society Healthy planning principles could provide a powerful logical motivation for all practitioners *Place Identity, Participation and Planning* Cliff Hague,Paul Jenkins,2005 Can regional identities create a more sustainable alternative to the increasingly standardised environments in which we live Is bottom up rather than top down planning possible **Handbook of Research on E-Planning: ICTs for Urban Development and Monitoring** Silva, Carlos Nunes,2010-05-31 This book provides relevant theoretical perspectives on the use of ICT in Urban Planning as well as an updated account of the most recent developments in the practice of e planning in different regions of the world Provided by publisher **Growth Management in the US** Karina Pallagst,2017-11-30 Urban sprawl is one of the key planning issues facing many US cities leading to the creation and adoption of a variety of approaches to control growth However many growth management ideas do not align well with the growth promoting planning traditions of the US which historically have been dominated by the concerns of the market the landowner and the developer Illustrated by a study of the San Francisco Bay Area this book puts forward an innovative theoretical approach to growth management analyzing it as a tool for controlling land use expansion in the US This region makes a particularly useful study as it has encountered long term growth pressures complex land use demands and the application of a wide variety of growth management approaches over the past few decades Using empirical qualitative analysis the book examines which growth management activities have actually been put into practice and which have proved successful and questions how such a planning approach functions in today s complex and multi faceted planning paradigms It concludes by stressing the different notions of interdependence in growth management regional interdependence interdependence between stakeholders and

interdependence in planning theory **Reviving Critical Planning Theory** Tore Øivin Sager, 2012-08-21 Discussing some of the most vexing criticism of communicative planning theory CPT this book goes on to suggest how theorists and planners can respond to it Looking at issues of power politics and ethics in relation to planning this book is for both critics and advocates of CPT with lessons for all With severe criticisms being raised against CPT the need has arisen to systematically think through what responsibilities planning theorists might have for the end uses of their theoretical work Offering inventive proposals for amending the shortcomings of this widely adhered planning method this book reflects on what communicative planning theorists and practitioners can and should do differently **Planning in Taiwan** Roger Bristow, 2010-05-04 Provides a history of planning in Taiwan and situates contemporary Taiwanese planning in the wider global context The book then covers challenges to planning urban change legal planning land problems the development of industrial land community planning conservation ecological land use planning for natural disasters and transportation planning *Alternative Visions of Post-War Reconstruction* John Pendlebury, Erdem Erten, Larkham J Peter, 2014-08-19 The history of post Second World War reconstruction has recently become an important field of research around the world *Alternative Visions of Post War Reconstruction* is a provocative work that questions the orthodoxies of twentieth century design history This book provides a key critical statement on mid twentieth century urban design and city planning focused principally upon the period between the start of the Second World War to the mid sixties The various figures and currents covered here represent a largely overlooked field within the history of 20th century urbanism In this period while certain modernist practices assumed an institutional role for post war reconstruction and flourished into the mainstream such practices also faced opposition and criticism leading to the production of alternative visions and strategies Spanning from a historically informed modernism to the increasing presence of urban conservation the contributors examine these alternative approaches to the city and its architecture **Building Competences for Spatial Planners** Anastassios Perdicoulis, 2011-03-22 This textbook for planning students and practitioners explains how to develop the necessary technical competences to perform practical tasks efficiently how to make and assess the quality of development proposals Tasso Perdicoulis presents suitable techniques for a wide range of planning tasks illustrates the application of those techniques with best practice examples and how to guard against potential pitfalls *Urban and Regional Planning* Peter Hall, Mark Tewdwr-Jones, 2010-12-14 This is the fifth edition of the classic text for students of urban and regional planning It gives an historical overview of the developments and changes in the theory and practice of planning throughout the entire twentieth century This extensively revised edition follows the successful format of previous editions it introduces the establishment of planning as part of the public health reforms of the late nineteenth century and goes on to look at the insights of the great figures who influenced the early planning movement leading up to the creation of the post war planning machine national and regional planning and planning for cities and city regions in the UK from 1945 to 2010 is then considered Specific reference is made to the most important British
