4 pages | 953 words

As the first official document that defined the United States government, the Articles of Confederation both reflected the principles and view points of the American Revolution and emphasized the practical uncertainties of democratic government. To say that the Articles of Confederation provided the United States with an effective government, would be over-exaggerating quite a bit. The Congress was weak, and was purposely designed to be weak. They were purposely set up as a weak government so that the government could be less threatening. The American government didn't want to be a tyrant like that of the British government. The Articles of Confederations initial intention was to provide a loose confederation or "firm league of friendship." Thirteen independent states were therefore linked together for joint action in dealing with foreign affairs. Despite their fragility, the Articles proved to be a landmark in government, and at that time a model of what a loose confederation should be.

The Articles of Confederation had many accomplishments and strengths. It ended the Revolutionary War. The U.S. government could claim some credit for the ultimate victory of Washington's army and for negotiating favorable terms in the treaty of peace with Britain. It kept the states unified during the war, and dealt successfully with western lands. The Land Ordinance of 1785 was set up to pay off debt, distributed land in an orderly fashion, and provided land for public education. The Northwest Ordinance of 1787 was probably the greatest domestic success of the Articles; stated that 60,000 people was needed to become a state. This would prevent future problems for western colonies, and it forbade slavery. [Document E] The Articles of Confederation maintained sovereignty and equality among states (each having one vote in Congress,) and had power to respond to foreign affairs, declare war, appoint military officers, and coin money. Despite the Articles of Confederations strengths, they were also relatively weak.

Under the Articles of Confederation nine out of thirteen states must agree to pass legislation, and all thirteen must agree to amend new articles; which were basically impossible. Neither did Congress have any executive power to enforce its own laws. Congress couldn't regulate trade between states and foreign nations, recruit a military force, nor uniform currency. Each state had it's own currency, which made travel and trade difficult.

Trade regulations varied from state to state which created further difficulties. In a letter from the Rhode Island Assembly to Congress in 1782, it showed that under the Articles, the central government could not levy taxes. To create a tax or change a law required a unanimous vote. Rhode Island listed a few reasons why they did not support the new tax. Some states refused to pay taxes. States argued about land and how some states received more land than the others. These issues led to Shay's Rebellion; where many farmers lost land due to foreclosure and tax delinquency. Hundreds rebelled demanding cheap paper money. This period in time showed the government was too weak.

Another problem the government faced due to the lack of strength of the Articles...

Barton, Linda S. Levstik, 2004-07-13 In *Teaching History for the Common Good* Barton and Levstik present a clear overview of competing ideas among educators historians politicians and the public about the nature and purpose of teaching history and they evaluate these debates in light of current research on students historical thinking In many cases disagreements about what should be taught to the nation s children and how it should be presented reflect fundamental differences that will not easily be resolved A central premise of this book though is that systematic theory and research can play an important role in such debates by providing evidence of how students think how their ideas interact with the information they encounter both in school and out and how these ideas differ across contexts Such evidence is needed as an alternative to the untested assumptions that plague so many discussions of history education The authors review research on students historical thinking and set it in the theoretical context of mediated action an approach that calls attention to the concrete actions that people undertake the human agents responsible for such actions the cultural tools that aid and constrain them their purposes and their social contexts They explain how this theory allows educators to address the breadth of practices settings purposes and tools that influence students developing understanding of the past as well as how it provides an alternative to the academic discipline of history as a way of making decisions about teaching and learning the subject in schools Beyond simply describing the factors that influence students thinking Barton and Levstik evaluate their implications for historical understanding and civic engagement They base these evaluations not on the disciplinary study of history but on the purpose of social education preparing students for participation in a pluralist democracy Their ultimate concern is how history can help citizens engage in collaboration toward the common good In *Teaching History for the Common Good* Barton and Levstik discuss the contribution of theory and research explain the theory of mediated action and how it guides their analysis and describe research on children s and adults knowledge of and interest in history lay out a vision of pluralist participatory democracy and its relationship to the humanistic study of history as a basis for evaluating the perspectives on the past that influence students learning explore four principal stances toward history identification analysis moral response and exhibition review research on the extent to which children and

adolescents understand and accept each of these and examine how the stances might contribute to or detract from participation in a pluralist democracy address six of the principal tools of history narrative structure stories of individual achievement and motivation national narratives inquiry empathy as perspective taking and empathy as caring and review research and conventional wisdom on teachers knowledge and practice and argue that for teachers to embrace investigative multi perspectival approaches to history they need more than knowledge of content and pedagogy they need a guiding purpose that can be fulfilled only by these approaches and preparation for participatory democracy provides such purpose Teaching History for the Common Good is essential reading for history and social studies professionals researchers teacher educators and students as well as for policymakers parents and members of the general public who are interested in history education or in students thinking and learning about the subject The Key to Understanding U.
