It presents an overview of key topics, problems, ideas, concepts and cases across seven thematic sections which include chapters addressing: The history of doping in sport; Philosophical approaches to understanding doping; The development of anti-doping policy; Studies of doping in seven major sports including athletics, cycling, baseball and soccer; In-depth analysis of four of the most prominent doping scandals in history, namely Ben Johnson institutionalized doping in the former GDR, the 1998 Tour de France and Lance Armstrong; WADA and the national anti-doping organizations; Key contemporary debates around strict liability, the criminalization of doping and zero tolerance versus harm reduction; Doping outside of elite sport in gyms, the military and the police. Holistic

Strength Training for Triathlon Andrew Johnston, 2011-02-22 Much more goes into a successful strength training program than reps and load. How one thinks, breathes, eats, drinks and sleeps has just as much impact on a person's vitality as how one moves. Indeed, failing to get the biochemistry right dooms even the best exercise prescription to failure. While most others treat the athlete as though the musculoskeletal system functions as an island, Andrew's approach is Holistic, inclusive of all key systems of the body-mind. Holistic Strength Training for Triathlon will teach the reader what is often neglected in both their pursuit of wellness and their pursuit of a place on the podium.
