

ANIMAL CELLS

Name _____

Label the organelles in the diagram below of a typical animal cell. Describe the function/purpose of each organelle in the cell.

- vacuole bubble like storage structure
- lysosome digests large particles
- ribosomes makes proteins
- Golgi complex stores and packages chemicals
- cytoplasm gel-like material that surrounds the organelles
- nucleus control center of the cell
- nucleolus contains genetic material
- nuclear membrane membrane that surrounds the nucleus
- cell (plasma) membrane membrane that surrounds the cell
- mitochondria makes energy (powerhouse of the cell)
- smooth endoplasmic reticulum internal transport system
- rough endoplasmic reticulum transport system with ribosomes
- centriole small dark long pieces used in cell division

College Biology Questions & Explanations Sterling Test Prep, 2023-05-09 Thousands of students use
Sterling Test Prep to achieve academic success Master essential cell and molecular biology college topics and increase your
grade This book helps you develop and apply knowledge to quickly choose the correct answers to cell and molecular biology
questions typically tested in college courses Targeted questions with detailed explanations that describe why an answer is
correct and more important for your learning why another attractive choice is wrong They teach the scientific foundations
and details of essential cell and molecular biology topics needed to answer questions of varying level of difficulty Read the
explanations carefully to understand how they apply to the question and learn important biology principles and the
relationships between them With the practice material contained in this book you will significantly improve your
understanding test scores and your grade Biology instructors with years of teaching experience prepared this practice
material to build your knowledge and skills crucial for success in a college biology course Our editorial team reviewed and
systematized the content for targeted preparation
