Greek Sport and Social Status Mark Golden,2009-09-15 From the ancient Olympic games to the World Series and the World Cup athletic achievement has always conferred social status In this collection of essays a noted authority on ancient sport discusses how Greek sport has been used to claim and enhance social status both in antiquity and in modern times Mark Golden explores a variety of ways in which sport provided a route to social status In the first essay he explains how elite horsemen and athletes tried to ignore the important roles that jockeys drivers and trainers played in their victories as well as how female owners tried to rank their equestrian achievements above those of men and other women In the next essay Golden looks at the varied contributions that slaves made to sport despite its use as a marker of free Greek status In the third essay he evaluates the claims made by gladiators in the Greek east that they be regarded as high status athletes and asserts that gladiatorial spectacle is much more like Greek sport than scholars today usually admit In the final essay Golden critiques the accepted accounts of ancient and modern Olympic history arguing that attempts to raise the status of the modern games by stressing their links to the ancient ones are misleading He concludes that the contemporary movement to call a truce in world conflicts during the Olympics is likewise based on misunderstandings of ancient Greek traditions

although its importance has been recognised in academic history in the growing and related fields of heritage and museum studies it has yet to be fully appreciated and brought into interaction More with historical studies Ideologically sport and heritage both convey powerful messages responsible for shaping our understanding of sport history and the past although they have essentially operated as separate spheres one important aspect of convergence between them is seen in the rise and popularity of sports museums the collecting of sporting art and memorabilia and popular concern over the demise of historic sports buildings and places The essays in this volume look at sports history as manifested in academic enquiry museum exhibition and heritage sites They deal among other things with the public representation of sport and why it matters its impact on public spheres the direction of sports heritage studies and what they should be attempting to achieve the role of museums in public history and the place memory and meaning in the historic sports landscape

International Sport
Richard William Cox,2004 There has been an explosion in the quantity of sports history literature published in recent years making it increasingly difficult to keep abreast of developments The annual number of publications has increased from around 250 to 1 000 a year over the last decade This is due in part to the fact that during the late 1980s and 90s many clubs leagues and governing bodies of sport have celebrated their centenaries and produced histories to mark this occasion and commemorate their achievements It is also the result of the growing popularity and realisation of the importance of sport history research within academe This international bibliography of books articles conference proceedings and essays in the English language is a one stop for the sports historian to know what is new
