Hybrid Solutions for the Modelling of Complex Environmental Systems Christian E. Vincenot,Stefano Mazzoleni,Lael Parrott,2017-01-11 Systems studied in environmental science due to their structure and the heterogeneity of the entities composing them often exhibit complex dynamics that can only be captured by hybrid modeling approaches While several concurrent definitions of hybrid modeling can be found in the literature it is defined here broadly as the approach consisting in coupling existing modelling paradigms to achieve a more accurate or efficient representation of systems The need for hybrid models generally arises from the necessity to overcome the limitation of a single modeling technique in terms of structural flexibility capabilities or computational efficiency This book brings together experts in the field of hybrid modelling to demonstrate how this approach can address the challenge of representing the complexity of natural systems Chapters cover applied examples as well as modeling methodology

Computational Modelling of Bifurcations and Instabilities in Fluid Dynamics Alexander Gelfgat,2018-07-06 Instabilities of fluid flows and the associated transitions between different possible flow states provide a fascinating set of problems that have attracted researchers for over a hundred years This book addresses state of the art developments in numerical techniques for computational modelling of fluid instabilities and related bifurcation structures as well as providing comprehensive reviews of recently solved challenging problems in the field

Supercomputing Vladimir Voevodin,Sergey Sobolev,Mikhail Yakobovskiy,Rashit Shagaliyev,2022-12-15 This book constitutes the refereed proceedings of the 8th Russian Supercomputing Days on Supercomputing RuSCDays 2022 which took place in Moscow Russia in September 2022 The 49 full papers and 1 short paper presented in this volume were carefully reviewed and selected from 94 submissions The papers are organized in the following topical sections Supercomputer Simulation HPC BigData AI Architectures Technologies Tools Distributed and Cloud Computing

Encyclopedia Of Two-phase Heat Transfer And Flow Iii: Macro And Micro Flow Boiling And Numerical Modeling Fundamentals (A 4-volume Set) John R Thome,2018-03-13 Set III of this encyclopedia is a new addition to the previous Sets I and II It contains 26 invited chapters from international specialists on the topics of numerical modeling of two phase flows and evaporation fundamentals of evaporation and condensation in microchannels and macrochannels development and testing of micro two phase cooling systems for electronics and various special topics surface wetting effects microfin tubes two phase flow vibration across tube bundles The chapters are written both by renowned university researchers and by well known engineers from leading corporate research laboratories Numerous must read chapters cover the fundamentals of research and engineering practice on boiling condensation and two phase flows two phase heat transfer equipment electronics cooling systems case studies and so forth Set III constitutes a must have reference together with Sets I

and II for thermal engineering researchers and practitioners

BIM Design Richard Garber, 2014-10-29 Building information modelling BIM is revolutionising building design and construction For architects BIM has the potential to optimise their creativity while reducing risk in the design and construction process thus giving them a more significant role in the building process This book demonstrates how innovative firms are using BIM technologies to move design away from the utilitarian problems of construction engaging them in a stunning new future in the built environment Whereas recent books about BIM have tended to favour case study analyses or instruction on the use of specific software BIM Design highlights how day to day design operations are shaped by the increasingly generative and collaborative aspects of these new tools BIM strategies are described as operations that can enhance design rather than simply make it more efficient Thus this book focuses on the specific creative uses of information modelling at the operational level including the creative development of parametric geometries and generative design the evaluation of environmental performance and the simulation and scheduling of construction fabrication operations This book also engages BIM's pragmatic efficiencies such as the conflict checking of building systems and the creation of bills of quantities for costing and in so doing it demonstrates how BIM can make such activities collaborative Throughout projects are used to illustrate the creative application of BIM at a variety of scales These buildings showcase work by firms executing projects all over the world SHoP Architects and Construction New York Morphosis Los Angeles Populous London GRO Architects New York Reiser Umemoto New York Gensler Shanghai and UNStudio Amsterdam

Impact of Scientific Computing on Science and Society Pekka Neittaanmäki, Marja-Leena Rantalainen, 2023-07-07 This book analyzes the impact of scientific computing in science and society over the coming decades It presents advanced methods that can provide new possibilities to solve scientific problems and study important phenomena in society The chapters cover Scientific computing as the third paradigm of science as well as the impact of scientific computing on natural sciences environmental science economics social science humanistic science medicine and engineering Moreover the book investigates scientific computing in high performance computing quantum computing and artificial intelligence environment and what it will be like in the 2030s and 2040s
