Little, Siri T. Hettige, 2014-05-23 Since the late 1970s Sri Lanka has undergone a socio economic transformation from protectionism towards economic liberalisation and increasing integration into the world economy Through a systematic comparison of these periods of economic change 1956 1977 and 1977 to the present Angela W Little and Siri T Hettige examine the impact of this transformation on education youth employment and equality of opportunity in Sri Lanka The book charts Sri Lanka s shift from a predominantly agricultural economy to one dominated by services and manufacturing a reduction in unemployment rising educational and occupational levels expectations and achievements and a reduction in poverty In turn it reveals a growing role for the private sector and foreign interests in post secondary education and a modest growth in private education at the primary and secondary levels as well as widening social disparities in access to qualifications training and skills The Sri Lankan experience of and engagement with globalisation has been tempered by a long running ethnic conflict that hindered economic and social development and diverted considerable public funds into defence and war Now that the war is won the challenge is how to invest in human resource development and the fulfilment of the expectations of youth from all ethnic and social groups This challenge requires serious policy analysis the generation of more state revenues the reallocation of existing public resources and a political commitment to the winning of a sustainable peace and stability This book makes an important contribution to the broader international literature on the implications of globalisation for education policy and practice and to the interaction of exogenous and endogenous forces for educational change It deals with the tension between the high social demand for education and the growing demand for specialised skills in a changing economy As such it has a wide interdisciplinary appeal across education policy and politics Asian education South Asian society youth policy sociology of education political economy of social change and globalisation Development, Education and Learning in Sri Lanka Angela W. Sri Lanka Jonathan Spencer, 2002-09-11 In the past decade Sri Lanka has been engulfed by political tragedy as successive governments have failed to settle the grievances of the Tamil minority in a way acceptable to the majority Sinhala population The new Premadasa presidency faces huge economic and political problems with large sections of the island under the control of the Indian Peace Keeping Force IPKF and militant separatist Tamil groups operating in the north and south This book is not a conventional political history of Sri Lanka Instead it attempts to shed fresh light on the historical roots of the ethnic crisis and uses a combination of historical and anthropological evidence to challenge the widely held belief that the conflict in Sri Lanka is simply the continuation of centuries of animosity between the Sinhalese and the Tamils The authors show how modern ethnic identities have been made and re-made since the colonial period with the war between Tamils and the Sinhala dominant government accompanied by rhetorical wars over archeological sites and place name etymologies and the political use of the national past The book is also one of the first attempts to focus on local perceptions of the crisis and draws on a broad range of sources from village fieldwork to newspaper controversies Its interest extends beyond contemporary politics to history anthropology and development studies
