environment based on a key set of service oriented architecture SOA and business process management BPM technologies. Such technologies include Service Component Architecture SCA, Service Data Object SDO, Business Process Execution Language BPEL for web services and Business Processing Modeling Notation BPMN. Both IBM Business Process Manager and Business Monitor build on the core capabilities of the IBM WebSphere Application Server infrastructure. As a result, Business Process Manager solutions benefit from tuning, configuration and best practices information for WebSphere Application Server and the corresponding platform Java virtual machines JVMs. This book targets a wide variety of groups both within IBM development services, technical sales and others and customers. For customers who are either considering or are in the early stages of implementing a solution incorporating Business Process Manager and Business Monitor, this document proves a useful reference. The book is useful both in terms of best practices during application development and deployment and as a reference for setup, tuning and configuration information. This book talks about many issues that can influence performance of each product and can serve as a guide for making rational first choices in terms of configuration and performance settings. Similarly, customers who already implemented a solution with these products can use the information presented here to gain insight into how their overall integrated solution performance can be improved.

DB2 Developer's Guide Craig S. Mullins, 2012-05-01. DB2 Developer's Guide is the field's 1 go to source for on the job information on programming and administering DB2 on IBM z/OS mainframes. Now three time IBM Information Champion, Craig S. Mullins has thoroughly updated this classic for DB2 v9 and v10. Mullins fully covers new DB2 innovations including temporal database support, hashing, universal tablespaces, pureXML, performance, security and governance improvements, new data types and much more. Using current versions of DB2 for z/OS, readers will learn how to build better databases and applications for CICS, IMS, batch, CAF and RRS/AF. Write proficient code, optimized DB2 SQL. Implement efficient dynamic and static SQL applications. Use binding and rebinding to optimize applications. Efficiently create, administer and manage DB2 databases and applications. Design, build and populate efficient DB2 database structures for online, batch and data warehousing. Improve the performance of DB2 subsystems, databases, utilities, programs and SQL. **DB2 Developer's Guide, Sixth Edition** builds on the unique approach that has made previous editions so valuable. It combines condensed, easy to read coverage of all essential topics, information otherwise scattered through dozens of documents. Detailed discussions of crucial details within each topic. Expert, field tested implementation advice. Sensible examples.

Easy Oracle Automation Arun Kumar R., 2005. Explaining how to use the powerful Oracle 10g automatic features for simple database administration, this book has complete coverage for 10g Automatic Storage Management ASM, 10g Automatic Workload Repository AWR, Automatic Database Diagnostic Monitor ADDM, Automatic SGA Management ASMM and the SQL Tuning Advisor. Demonstrated is how a non-Oracle person can quickly install and configure Oracle database 10g for automatic database administration and how in less than a day a complete Oracle 10g database can be ready to use. Also explained is easy disk and file management.
