Fairclough, Thorsten O. Zander, Hasan Ayaz, 2017-07-04 This Research Topic is dedicated to Raja Parasuraman who unexpectedly passed on March 22nd 2015 Raja Parasuraman s pioneering work led the emergence of Neuroergonomics as a new scientific field He combined his research interests in the field of Neuroergonomics which he defined as the study of the human brain in relation to performance at work and everyday settings Raja Parasuraman was a pioneer a truly exceptional researcher and an extraordinary person He made significant contributions to a number of disciplines from human factors to cognitive neuroscience His advice to young researchers was to be passionate in order to develop theory and knowledge that can guide the design of technologies and environments for people His legacy the field of Neuroergonomics will live on in countless faculties and students whom he advised and inspired with unmatched humility throughout the whole of his distinguished career Raja Parasuraman was an impressive human being a very kind person and an absolutely inspiring individual who will be remembered by everyone who had the chance to meet him About this Research Topic Since the advent of neuroergonomics significant progress has been made with respect to methodology and tools for the investigation of the brain and behavior at work This is especially the case for neuroscientific methods where the availability of ambulatory hardware wearable sensors and advanced data analyses allow for imaging of brain dynamics in humans in

applied environments Methods such as electroencephalography EEG functional near infrared spectroscopy fNIRS and stimulation approaches like transcranial direct current stimulation tDCS have made significant progress in both recording and altering brain activity while allowing full body movements outside laboratory environments For neuroergonomics the application of brain imaging in real world scenarios is highly relevant Traditionally brain imaging experiments in human factors research tend to avoid active behavior for fear of artifacts and a contaminated data set that would provide limited insight into brain dynamics in real working environments To overcome these problems new analyses approaches have to be developed that identify artifacts resulting from hostile recording environments and movement related non brain activity stemming from eye head and full body movements The application of methodology from the field of Brain Computer Interfacing BCI for neuroergonomics is one approach that has significant potential to enhance ambulatory monitoring and applied testing Passive BCIs allow for assessing aspects of the user state online such that systems can automatically adapt to their user This neuroadaptive technology could lead to highly efficient working environments to auto adaptive experimental paradigms and to a continuous tracking of cognitive and affective aspects of the user state Hence deployment of portable neuroimaging technologies to real time settings could help assess cognitive and motivational states of personnel assigned to perform critical tasks This Research Topic gathers submissions that cover new approaches in neuroergonomics Different article type cover advanced neuroscience methods and neuroergonomics techniques as well as analysis approaches to investigate brain dynamics in working environments The selection of papers provides insights into new neuroergonomic research approaches that demonstrate significant advances in brain imaging technologies that become more and more mobile Moreover a strong trend for new analyses approaches and paradigms investigating real work settings can be seen Together this unique collection of latest research papers provides a comprehensive overview on the latest developments in neuroergonomics

Proceedings ... Web3D Symposium, 2004 *Innovationspfade* Uli Meyer, 2016-02-16 Das von Uli Meyer präsentierte Modell der Innovationspfade eröffnet eine neue Perspektive auf die Entwicklung komplexer Technologie. Dazu integriert es Einsichten des soziologischen Neo Institutionalismus und sozialer Evolutionstheorien, um zu erklären, wie Innovationspfade entstehen und welche Mechanismen sie stabilisieren und verstärken. Die vorgestellte Perspektive wird der Tatsache gerecht, dass Technologie zunehmend in stabilen Netzwerken vieler Organisationen hervorgebracht wird und nicht mehr von einzelnen Organisationen oder Erfindern. Innovationspfade sind Ausdruck und gleichzeitig Treiber der zunehmend routinisierten und verstetigten Suche nach Neuem. Das Modell wird am Beispiel der Etablierung von Elektroniksystemen in der Automobilindustrie, insbesondere Fahrerassistenzsystemen, entwickelt. Transnationale Direktinvestitionen und kulturelle Unterschiede Heiner Depner, 2015-07-15 In dieser Studie wird auf breiter empirischer Grundlage dargestellt, auf welche Hindernisse deutsche Investoren stoßen können, wenn sie in einem anderen nationalen Kontext Joint Ventures mit heimischen Unternehmen bilden und versuchen, Vorprodukte von lokalen Lieferanten zu beziehen. Dem empirischen Beispiel deutscher Automobilzulieferer in Shanghai ist eine theoretische Begründung der auftretenden Abstimmungsprobleme vorangestellt. Resümierend werden Empfehlungen ausgesprochen, wie kulturelle Unterschiede überwunden werden können.

Explaining EU Internal Security Cooperation Mark Rhinard, Raphael Bossong, 2017-12-22 Internal security is often hailed as a rapidly expanding area of European integration with a growing number of strategies, policies and framework agreements in recent years. Yet actual cooperation, when viewed closely, proceeds at a halting pace, raising questions as to why cooperation appears so problematic. This book presents a novel, theoretically informed way to understand internal security cooperation in Europe. The approach treats internal security as a public good requiring collective action amongst sovereign governments. All governments must contribute to the production of a public good; once produced, the public good benefits all governments. Fundamental obstacles to producing a public good thus arise and can help explain the underlying difficulties facing European cooperation on internal security matters. The chapters in this book apply a public goods approach to different internal security issues, ranging from terrorism to border management and from environmental security to natural disasters. Each study demonstrates how the various goals of internal security cooperation resemble different forms of public goods and thus present different kinds of obstacles to effective cooperation. This book fills a theoretical gap in the literature on European internal security cooperation with a proven approach increasingly used in other scholarly fields. This book was published as a special issue of *European Security*. *Focus On: 100 Most Popular Sedans* Wikipedia contributors, Dutch Design 2004-2005 Beroepsorganisatie Nederlandse Ontwerpers, 2004 This superbly produced biannual presents the best from Holland's cutting edge design. This two volume set is a veritable hotbed of creative inspiration. Dutch designers have set many of today's design benchmarks and not just in Holland.
