European Values François Foret, Oriane Calligaro, 2018-06-14 Redefinitions of EU borders enlargements Brexit geopolitical challenges conflicts migrations terrorism environmental risks and the economic and financial crises have triggered debates on the common values that hold European countries and citizens together justify public action and ensure the sustainability of European governance This book discusses the genesis of and increasing references to European values their appropriation by diverse groups of actors and their impact on public action It argues that European values are a broad and flexible symbolic repertoire instrumental to serving diverging ends and a resource for both negotiation and conflicts Looking at the broader picture the book reflects on the role of values in the institutionalization of the EU as a political order and paves the way to an assessment of its singularity in comparison with other polities across time and space This text will be of key interest to scholars students and practitioners in EU politics comparative politics IR public policy sociology and cultural studies

Contemporary Europe William Outhwaite, 2016-10-04 Europe is one of the most dynamic and interesting areas of the world pioneering in the European Union a new form of governance for half a billion people represented in the world's first directly elected transnational parliament This book situates the European Union in a broader European global historical and geographical context providing a readable presentation of the most important facts and drawing on the theoretical approaches which have transformed the study of contemporary Europe over the past two decades The European Union is still on the road to what has been called an unknown destination and this book presents its economic political legal and social trajectory from the middle of the last century to the present Contemporary Europe covers some of these issues in an interdisciplinary framework aiming to situate the development of the European Union in a broader context of pan European and global processes Europe has been cut down to size but it does not have to become a global backwater and the study of contemporary Europe's institutional reality does not have to be boring The book counter this misperception conveying the essential facts and theories of contemporary European reality in a clear and approachable analysis It will serve as a readable introduction both to the academic field of European studies and to contemporary Europe itself

Bittersweet Europe Adrian Brisku, 2013-08-01 From the late nineteenth century to the post communist period Albanian and Georgian political and intellectual elites have attributed hopes to Europe yet have also exhibited ambivalent attitudes that do not appear likely to vanish any time soon Albanians and Georgians have evoked experienced and continue to speak of Europe according to a tense triadic entity geopolitics progress culture which has

generated aspirations as well as delusions towards it and themselves This unique dichotomy weaves a nuanced historical account of a changing Europe continuously marred by uncertainties that greatly affect these countries domestic politics as well as foreign policy decisions A systematic and rich account of how Albanians and Georgians view Europe this book offers a fresh perspective on the vast East West literature and more broadly on European intellectual cultural and political history

Architecture on the Borderline Anoma Pieris, 2019-06-25 Architecture on the Borderline interrogates space and territory in a turbulent present where nation state borders are porous to a few but impermeable to many It asks how these uneven and conflicted social realities are embodied in the physical and material conditions imagined produced or experienced through architecture and urbanism Drawing on historical global examples this rich collection of essays illustrates how empires nations and cities expand their frontiers and contest boundaries but equally how borderline identities of people and places influence or expose these processes Empirical chapters covering Central Asia the Asia Pacific region the American continent Europe and the Middle East offer multiple critical insights into the ways in which our spatial imagination is contingent on border thinking on the ways of being and navigating frontiers boundaries and margins the three themes used to organise their content The underlying premise of the book is that sensitisation to border conditions can alter our understanding of the static physical spaces that service political or cultural ideologies and that the view from the periphery opens up new ways of understanding sovereignty In exploring these various spaces and their transformative subjectivities this book also reveals the unrelenting precarity of contesting and living on the margins and related spaces and discourses that are neglected or suppressed

Ukraine and Beyond Janne Haaland Matlary, Tormod Heier, 2016-08-05 This book is the first full spectrum analysis of Russian and European norms of political action ranging from international law ethics and strategy to the specific norms for the use of force It brings together leading scholars from these various fields examining the differences in norm understanding between Russia and Europe In light of the 2014 occupation and annexation of Crimea by Russia and its subsequent covert participation in the internal affairs of Ukraine including aggressive flying and major military exercises Russia seems to be a classical revisionist power intent on changing the balance of power in Europe in particular It also reaches beyond Europe inserting itself as the key actor in the Syrian war The book therefore considers how we should understand Russia It also questions whether or not the West in particular Europe responds adequately in this delicate and dangerous new situation The book concludes that at present Russia acts strategically and with considerable success whereas Europe is reactive in its response

Human Rights and Democracy in EU Foreign Policy Rosa Balfour, 2013-06-17 This book investigates the disparity between rhetoric and performance in the European Union response to abuses of human rights and transgression of democracy With the Arab spring putting the spotlight on the EU s self portrait as committed to promoting global human rights and democracy this book examines the

paradoxes of its international posture and the inconsistencies and double standards of its policies With an informative and empirical approach examining EU relations since the end of the Cold War this book seeks to uncover the reasons behind the Union's actions and understand the foreign policy dilemmas and processes that guide its action Including detailed analysis of Ukraine and Egypt and the EU response to momentous changes for neighbouring nations the author draws upon thoroughly researched investigation into twenty years of EU foreign policy to create a framework using both EU Studies and International Relations Providing a deeper analysis than other dominant explanations this book presents new theories on the reasons behind the mismatch between words and deeds An invaluable and timely volume Human Rights and Democracy in EU Foreign Policy will be of interest to students and scholars of EU politics International Relations and human rights policy

One Belt, One Road, One Story? Alister Miskimmon, Ben O'Loughlin, Jinghan Zeng, 2020-12-21 This book explores the emerging EU China relationship with a focus on the impact of the Belt and Road Initiative It takes a narrative approach to understanding the EU China relationship as a means to highlight how scholars in the EU and China interpret the narrativization of EU China bilateral relations and to how this bilateral relationship is refracted through relations with third parties The volume brings together scholars from China and Europe in the fields of Chinese foreign policy EU studies and strategic communication The empirical focus cuts across policy publics and media and across history political economy and diplomacy The Belt and Road Initiative alongside the other policy areas addressed in the chapters offers ways for people in Europe and China to get to know one another in new ways and for the EU and its member states and the Chinese state to forge new partnerships

Misnomers and Cultural Choices Raphael Israeli, 2019-08-06 Misnomers are often used in international politics to describe issues and situations that use common words but carry different meanings For example tolerance suicide bombers women's equality and many other words are commonly used by Muslims to make us believe that these words mean the

equivalent of the jargon we know when in fact they cover up dark schemes that depart miles from conventional meanings. Tolerance means for us to accept others as they are without value judgment. For Muslims it means accepting others often temporarily despite their inherent inferiority until converting or dominating them becomes feasible. Suicide bombers for us means terrorists who do not care for human life and are prepared to kill themselves together with other targeted enemies. For Muslims these bombers are holy martyrs who sacrifice themselves for the sake of Allah by killing enemies of Islam and are assured the bliss of Paradise in the proximity of Allah. Women are diminished and relegated to a second rate status in Islam. Women can be beaten and disciplined while at the same time equality and special concern is claimed for them. A wide array of examples and situations of Muslim misnomers are cited and elaborated in the book **Slippery Slope** Giles Merritt, 2016-06-01. Shortlisted for 2016 European Book Prize. Giles Merritt describes himself as a sceptical europhile. For many years among the foremost commentators on the politics and economics shaping Europe he was named by the Financial Times as one of 30 Eurostars who are the most influential voices in Brussels. Slippery Slope is far from the usual run of uncritical EU related studies. Its aim is to set alarm bells ringing across Europe with its revealing insights into our increasingly troubled future. Giles Merritt argues that the steepness and suddenness of Europe's decline in the Asian century will depend on the actions we Europeans undertake. And there are two key lessons that we need to face from the beginning. Firstly the good times aren't coming back without a massive effort on our part. And secondly in a fast developing world of 9-10 billion people no single European country can survive and prosper on its own. Merritt sets out to sort fact from fiction in his analysis of Europe's weaknesses and the policies needed to address them. Placing the outlook for Europe in its global context he assesses Europe's decline in relative as well as absolute terms and puts forward an ambitious but realistic to do list for Europe's policymakers if our comparatively privileged life styles are not to be seriously threatened in the coming years. In the wake of Brexit this is a hard hitting warning that unless Europeans shake themselves awake their future will be increasingly gloomy. Anyone who believes that the economic crisis that began in 2008 is just a blip will find this book a salutary lesson in the reality of Europe's position. **European Security in Integration Theory** Kamil Zwolski, 2018-02-08. This book examines federalism and functionalism two fundamental yet largely forgotten theories of international integration. Following the recent outbreak of the war in Ukraine policy practitioners and scholars have been in search of a deeper understanding of the likely causes of the conflict and its consequences for the European security architecture. Various theories have been deployed to this end but international and European integration theory remains conspicuously absent. The author shows how the core tenets of integration theories developed after World War I particularly how they viewed territoriality and geopolitical boundaries remain as relevant today as they were almost 100 years ago. Europe's Eastern Crisis Richard Youngs, 2017-04-06. This book uncovers the changing way the EU is conducting its foreign policy in response to the Ukraine conflict and tensions with Russia. The World Economy Towards Global Disequilibrium M. Baldassarri, P.

Capretta,2007-07-30 The rise of China and India has completely changed the world economy moving it towards disequilibrium Several alternative economic policies are tested to seek a way towards high growth in any continent associated with long run real and financial equilibrium The authors argue for a new exchange rate system and a new world governance

Iran and Turkey Marianna Charountaki,2018-03-30 The foreign policies of Turkey and Iran seem increasingly to dictate the course of events in the Middle East More recently and especially following the Syrian crisis the spotlight has turned to these states dynamic re entry onto the political stage revealing them as key players with an international role in efforts towards the balance of power across the region This book traces the major determinants of Turkish and Iranian foreign policies and their influence on events in the Middle East Based on an examination of these states politics and policies since 1979 and using material gathered from interviews with leading political figures from Turkey Iran and the Kurdistan Region of Iraq Marianna Charountaki offers fresh insights into how we understand the contemporary global order Of particular importance this book shows is the effect of both external and internal factors on foreign policy and how the interaction between state and non state actors informs political decisions In placing these issues in a theoretical framework Marianna Charountaki pioneers a new conceptual map within International Relations An interdisciplinary study that provides a fresh new perspective this book will be of particular interest to scholars of International Relations Politics Foreign Policy Kurdish and Middle East Studies

Patterns of Disintegration. The EU and the Emerging European Order Federico Nicolaci,2012-08-15 Paraphrasing Marx one could say that a spectre is hunting Europe the spectre of disintegration The crisis of the Monetary Union the pinnacle of European integration seems to call into question the core assumption of more than half a century of Europe s integration history the functionalist idea that economic integration would be self sustaining and would ultimately lead to the emergence of a political community This book presents evidence suggesting that the current crisis is not an accidental snag but the collapse of the ideological architecture of Europe showing that the disintegrating dynamics threatening the EU are structurally determined
