Reiff,2015-10-07 With unemployment at historically high rates that show signs of becoming structural there is a pressing need for an in depth exploration of this economic injustice Unemployment is one of the problems most likely to put critical pressure on our political institutions disrupt the social fabric of our way of life and even threaten the continuation of liberalism itself Despite the obvious importance of the problem of unemployment however there has been a curious lack of attention paid to this issue by contemporary non Marxist political philosophers On Unemployment explores the moral implications of the problem of unemployment despite the continuing uncertainty involving both its causes and its cures Reiff takes up a series of questions about the nature of unemployment and what justice has to tell us about what we should do if anything to alleviate it The book comprehensively discusses the related theory and suggests how we might implement these more general observations in the real world It addresses the politics of unemployment and the extent to which opposition to some or all of the book's various proposals stem not from empirical

disagreements about the best solutions but from more basic moral disagreements about whether the reduction of unemployment is indeed an appropriate moral goal This exciting new text will be essential for scholars and readers across business economics and finance as well as politics philosophy and sociology

The Fight for \$15 David Rolf, 2015-04-07 Rolf shows that raising the minimum wage to 15 is both just and necessary lest the American dream of middle class prosperity turn into a nightmare David Cay Johnston Pulitzer Prize winning journalist Combining history economics and commonsense political wisdom The Fight for 15 makes a deeply informed case for a national fifteen dollars an hour minimum wage as the only practical solution to reversing America's decades long slide toward becoming a low wage nation Drawing both on new scholarship and on his extensive practical experiences organizing workers and grappling with inequality across the United States David Rolf president of SEIU 775 which waged the successful Seattle campaign for a fifteen dollar minimum wage offers an accessible explanation of middle out economics an emerging popular economic theory that suggests that the origins of prosperity in capitalist economies lie with workers and consumers not investors and employers A blueprint for a different and hopeful American future The Fight for 15 offers concrete tools ideas and inspiration for anyone interested in real change in our lifetimes The author's plainspoken approach and stellar scholarship illuminate in depth discussions about the deliberate policy decisions that began to decimate the middle class at the start of the 1980s as well as the insidious new ways in which big business continues to attack American workers today via stagnant wages rampant subcontracting unpredictable scheduling and other detrimental practices associated with the so called share economy Kirkus Reviews David Rolf has become the most successful advocate for raising wages in the twenty first century Andy Stern senior fellow at Columbia University's Richard Paul Richman Center for Business Law and Public Policy

With a foreword by Angela Garbes. From the president of the Economic Security Project, a book showing how a just future is around the corner if we are ready to seize it. The Guarantee asks us to imagine an America where housing, health care, a college education, dignified work, family care, an inheritance and an income floor are not only attainable by all but guaranteed by our government for everyone. But isn't this pie in the sky thinking? Not by a long shot, as this provocative new book reveals. As it stands, our current economic system is chock full of government-backed guarantees: from bailouts to bankruptcy protection to keep the private sector in business. So why can't the same be true for the rest of us? Author Natalie Foster, co-founder of the Economic Security Project, has had a front-row seat to the dramatic leaps forward in government guarantees over the past decade, from student debt relief to the child tax credit expansion. Her brilliantly sketched vision for a new Guarantee Framework is rooted in real-life experiences, collaborations with some of today's most important activists and visionaries, and a concrete sense of the policies that are possible and ready to implement in twenty-first-century America. The Guarantee is the rare book that will shift the terms of debate, moving us from the expired and defunct assumptions of no-guardrails capitalism to a nation that works for all of its people. **Raising the Redwood Curtain** Michael T. Karp,

Congressional Record United States. Congress, 2013. **Issues for Debate in American Public Policy** CQ Researcher, 2016-05-24. This collection of non-partisan reports written by award-winning CQ Researcher journalists focuses on provocative current policy issues. As an annual publication that comes together just months before it goes to press, the volume is all new and as up-to-date as possible. And because it's CQ Researcher, the policy reports are expertly researched and written, showing all sides of an issue. Chapters follow a consistent organization: exploring three issue questions, then offering background, current context, and a look ahead, and feature a pro-con debate box. All issues include a chronology, bibliography, photos, charts, and figures. All selections are brand new and explore some of today's most significant American public policy issues, including the marijuana industry, air pollution, and climate change, racial conflict, housing discrimination, campus sexual assault, transgender rights, reforming veterans' health care, and immigrant detention. The UK Regional-National Economic Problem Philip McCann, 2016-03-10. In recent years, the United Kingdom has become a more and more divided society, with inequality between the regions as marked as it has ever been. In a landmark analysis of the current state of Britain's regional development, Philip McCann utilises current statistics, examines historical trends, and makes pertinent international comparisons to assess the state of the nation. The UK Regional National Economic Problem brings attention to the highly centralised top-down governance structure that the UK deploys and demonstrates that it is less than

ideally placed to rectify these inequalities The North South divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity incomes employment status and wealth Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland in contrast the Midlands the North of England Northern Ireland and Wales lag behind by most measures of prosperity This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored The UK s economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends although this definitive study suggests that some areas of improvement are possible if they are well implemented This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government

Greenberg,Penny Lewis,2017-06-06 Urban public spaces from the streets and squares of Buenos Aires to Zuccotti Park in New York City have become the emblematic sites of contentious politics in the twenty first century As the contributors to The City Is the Factory argue this resurgent politics of the square is itself part of a broader shift in the primary locations and targets of popular protest from the workplace to the city This shift is due to an array of intersecting developments the concentration of people profit and social inequality in growing urban areas the attacks on and precarity faced by unions and workers movements and the sense of possibility and actual leverage afforded by local politics and the tactical use of urban space Thus the city from the town square to the banlieu is becoming like the factory of old a site of production and profit making as well as new forms of solidarity resistance and social reimagining We see examples of the city as factory in new place based political alliances as workers and the unemployed find common cause with right to the city struggles Demands for jobs with justice are linked with demands for the urban commons from affordable housing to a healthy environment from immigrant rights to urban citizenship and the right to streets free from both violence and racially biased policing The case studies and essays in The City Is the Factory provide descriptions and analysis of the form substance limits and possibilities of these timely struggles Contributors Melissa Checker Queens College and the Graduate Center of the City University of New York Daniel Aldana Cohen University of Pennsylvania Els de Graauw Baruch College City University of New York Kathleen Dunn Loyola University Chicago Shannon Gleeson Cornell University Miriam Greenberg University of California Santa Cruz Alejandro Grimson Universidad de San Mart n Argentina Andrew Herod University of Georgia Penny Lewis Joseph S Murphy Institute for Worker Education and Labor Studies City University of New York Stephanie Luce Joseph S Murphy Institute for Worker Education and Labor Studies City University of New York Lize Mogel artist and coeditor of An Atlas of Radical Cartography Gretchen Purser Maxwell School of Citizenship and Public Affairs Syracuse University
