The Cambridge International Handbook of Lean Production Thomas Janoski, Darina Lepadatu, 2021-03-11 This handbook focuses on two sides of the lean production debate that rarely interact On the one hand management and industrial engineering scholars have presented a positive view of lean production as the epitome of efficiency and quality On the other hand sociology industrial relations and labor relations scholars focus on work speedups management by stress trade union positions and self exploitation in lean teams The editors of this volume understand the merits of both views and present them accordingly bridging the gaps among five disciplines and presenting the best of each perspective Chapters by internationally acclaimed authors examine the positive negative and neutral possible effects of lean providing a global view of lean production while adjusting lean to the cultural and political contexts of different nation states As the first multi lens view of lean production from academic and consultant perspectives this volume charts a way forward in the world of work and management in our global economy

The Routledge International Handbook of the Crimes of the Powerful Gregg Barak, 2015-06-05 Across the world most people are well aware of ordinary criminal harms to person and property Often committed by the powerless and poor these individualized crimes are catalogued in the statistics collected annually by the FBI and by similar agencies in other developed nations In contrast the more harmful and systemic forms of injury to person and property committed by powerful and wealthy individuals groups and national states are neither calculated by governmental agencies nor annually reported by the mass media As a result most citizens of the world are unaware of the routinized crimes of the powerful even though they are more likely to experience harms and injuries from these types of organized offenses than they are from the atomized offenses of the powerless Research on the crimes of the powerful brings together several areas of criminological focus involving organizational and institutional networks of powerful people that commit crimes against workers marketplaces taxpayers and political systems as well as acts of torture terrorism and genocide This international

handbook offers a comprehensive authoritative and structural synthesis of these interrelated topics of criminological concern. It also explains why the crimes of the powerful are so difficult to control. Edited by internationally acclaimed criminologist Gregg Barak, this book reflects the state of the art of scholarly research covering all the key areas including corporate global environmental and state crimes. The handbook is a perfect resource for students and researchers engaged with explaining and controlling the crimes of the powerful domestically and internationally. **Revolutionizing Retail K.**

Coulter, 2014-02-20 There is a modest but growing body of scholarly literature on experiences of retail work with only a handful of studies existing on retail organizing. Before *Revolutionizing Retail*, no scholar had captured or analysed the breadth of political action being pursued in this crucial economic sector. This book was awarded the Canadian Association for Work and Labour Studies 2015 Book Prize. *Corporate Social Responsibility, Sustainability and Public Relations* Donnalyn

Pompper, 2015-11-19 While public relations offers numerous assets for organization stakeholder relationship building and for ethical corporate social responsibility and sustainability communication, it also faces challenges linked to negative perceptions of the profession which can lead to accusations of greenwashing. This innovative book critically explores the growing complex and sometimes contradictory connections among public relations, corporate social responsibility and sustainability. This book advocates a postmodern insider activist role for public relations which can transform organizations into moral places committed to people, planet and profit. By amplifying voices of nearly 100 for-profit and non-profit professionals and using hermeneutic phenomenological theme analyses of CSR Sustainability reports and websites, this book invokes public relations postmodern and critical theories to empower public relations professionals to transform organizations into ethical, authentic and transparent actors in the public sphere. It is essential reading for scholars, educators and enquiring professionals working in public relations, corporate communication, sustainability and corporate social responsibility. **Human Resource Management** Talya Bauer, Berrin Erdogan, David Caughlin, Donald Truxillo, 2019-01-02

Reiff, 2015-10-07 With unemployment at historically high rates that show signs of becoming structural there is a pressing need for an in depth exploration of this economic injustice Unemployment is one of the problems most likely to put

critical pressure on our political institutions disrupt the social fabric of our way of life and even threaten the continuation of liberalism itself. Despite the obvious importance of the problem of unemployment, however, there has been a curious lack of attention paid to this issue by contemporary non-Marxist political philosophers. *On Unemployment* explores the moral implications of the problem of unemployment despite the continuing uncertainty involving both its causes and its cures. Reiff takes up a series of questions about the nature of unemployment and what justice has to tell us about what we should do if anything to alleviate it. The book comprehensively discusses the related theory and suggests how we might implement these more general observations in the real world. It addresses the politics of unemployment and the extent to which opposition to some or all of the book's various proposals stem not from empirical disagreements about the best solutions but from more basic moral disagreements about whether the reduction of unemployment is indeed an appropriate moral goal. This exciting new text will be essential for scholars and readers across business, economics and finance as well as politics, philosophy and sociology.
