Since the early 1940s, when first identified as childhood psychosis and autistic psychopathy, autism spectrum disorder (ASD) has continued to burgeon into a major focus of inquiry and interest among researchers, practitioners, and the public alike. With each passing decade, the number of scholarly articles addressing ASD and related disabilities continues to soar. Today, thousands of papers on autism are published annually across various disciplines and journals, making it challenging, if not impossible, to keep pace with, let alone synthesize, all the latest developments. Based on a solid historical foundation of autism theory and research, the International Handbook of Autism and Pervasive Developmental Disorders integrates the broad scholarly base of literature with a trenchant analysis of the state of the field in nosology, etiology, assessment, and treatment. Its expert contributors examine recent findings and controversies, e.g., how prevalent autism actually is, along with longstanding topics of interest as well as emerging issues. Coverage includes a survey of diagnostic criteria and assessment strategies; genetic, behavioral, biopsychosocial, and cognitive models; psychiatric disorders in persons with ASD; theory of mind and facial recognition; diagnostic instruments for assessing core features and challenging behaviors; evidence-based

psychosocial pharmacological and integrative treatments Interventions specifically for adults with ASD Training issues for professionals and parents A review of findings of successful and promising therapies coupled with guidance on how to distinguish between dubious and effective treatments The International Handbook of Autism and Pervasive Developmental Disorders is an indispensable resource for researchers professors graduate students and allied practitioners in clinical child and school psychology child and adolescent psychiatry education social work rehabilitation pediatric medicine and developmental psychology Guide to Port Entry ,2001 *Energy Research Abstracts* ,1980 Monthly Catalogue, United States Public Documents ,1993-08 *Net Zero Energy Buildings (NZEB)* Shady Attia,2025-08-26 Net Zero Energy Buildings NZEB Concepts Frameworks and Roadmap for Project Analysis and Implementation Second Edition is a vital resource for researchers and professionals in civil engineering and architecture This updated version includes examples from the New Buildings Institute s Getting to Zero Buildings Database and revised sections shaped by ongoing collaboration with industry experts and researchers This book is a detailed guide to planning designing and implementing high performance buildings providing practical methodologies to meet global decarbonization targets including the EU s 2050 and China s 2060 zero carbon goals It addresses critical challenges related to the energy transition focusing on electrification decarbonization calculations lifecycle assessment and advanced technologies like data analytics and digital twins to optimize a building s performance With real world case studies from diverse climates and building types this second edition highlights lessons learned and actionable strategies to overcome implementation barriers and drive meaningful change in the built environment Offers a solid grounding in key principles of energy efficiency lifecycle assessment and decarbonization specific to high performance buildings Combines technical expertise with an understanding of economic sociocultural and environmental factors for integrated sustainable building solutions Provides essential tools and strategies for informed decision making throughout the building lifecycle from planning and design to construction and operation Explores the application of technologies such as photovoltaics heat pumps batteries and innovative building storage systems including phase change materials to enhance energy performance and support decarbonization *Monthly Catalog of United States Government Publications* ,1993 **The Oxford Handbook of Genetic Counseling** Deem,Michael J.
