between traditional tourism academia and outside disciplines looking in Tourism academia has borrowed philosophical ethical gender studies sociological ecological conservation and economic lenses to explore animals in tourism however collaboration with authors external to tourism studies remains few This edited volume strengthens the bridge between tourism academia and other disciplines by highlighting the fresh perspectives emerging methodologies and innovative interdisciplinary conventions at the forefront of animals in tourism research whilst critically working towards more ethical human animal interactions within the tourism and leisure space Split into four parts emerging motivations emerging cultures emerging narratives and emerging reflections this unique text will be widely applicable to scholars working towards equitable human animal interactions within tourism **The Human Animal Earthling Identity** Carrie P.

Freeman, 2020-12-01 With *The Human Animal Earthling Identity* Carrie P. Freeman asks us to reconsider the devastating division we have created between the human and animal conditions leading to mass exploitation injustice and extinction As a remedy Freeman believes social movements should collectively foster a cultural shift in human identity away from an egoistic anthropocentrism human centered outlook and toward a universal altruism species centered ethic so people may begin to see themselves more broadly as human animal earthlings To formulate the basis for this identity shift Freeman examines overlapping values supporting life fairness responsibility and unity that are common in global rights declarations and in the current campaign messages of sixteen global social movement organizations that work on human civil rights nonhuman animal protection and or environmental issues such as Amnesty International Human Rights Watch CARE People for the Ethical Treatment of Animals the World Wildlife Fund the Sea Shepherd Conservation Society the Nature Conservancy the Rainforest Action Network and Greenpeace She also interviews the leaders of these advocacy groups to gain their insights on how human and nonhuman protection causes can become allies by engaging common opponents and activating shared values and goals on issues such as the climate crisis enslavement extinction pollution inequality destructive farming and fishing and threats to democracy Freeman's analysis of activist discourse considers ethical ideologies on behalf of social justice animal rights and environmentalism using animal rights respect for sentient individuals as a bridge connecting human rights to a more holistic valuing of species and ecological systems Ultimately Freeman uses her findings to recommend a set of universal values around which all social movements campaign messages can collectively cultivate respectful relations between human animal earthlings fellow sentient beings and the natural world we share [Like an Animal: Critical Animal Studies](#)

[Approaches to Borders, Displacement, and Othering](#), 2021-06-17 The contributors of *Like an Animal* challenge most fundamental concepts in the fields of racism dehumanization borders displacement and refugees that rest on the assumption of humanism They show how we can bend the arc of the moral universe toward justice at the border The goal of this interdisciplinary collection is twofold First to invite border migration studies to consider a broader social justice perspective that includes nonhuman animals Second to start a discussion if nonhumans maybe refugees of a kind and how humans can

address nonhumans interests and needs from the perspective of addressing refugee issues As capitalism and the climate crisis are taking a catastrophic toll on the planet this timely volume exposes the alternative origins of violence that lie at the heart of the planet s destruction *Hidden: Animals in the Anthropocene* Jo-Anne McArthur, Keith Wilson, 2020-11-17 A collection of stunning images from some of the world s leading photographers of animals in the human environment HIDDEN Animals in the Anthropocene is an unflinching book of photography about our conflict with non human animals around the globe Through the lenses of thirty award winning photojournalists HIDDEN shines a light on the invisible animals in our lives those with whom we have a close relationship and yet fail to see The animals we eat and wear the animals we use for research work and for entertainment the animals we sacrifice in the name of tradition and religion HIDDEN is a historical document a memorial and an indictment of what is and should never again be Showcased by award winning designer David Griffin HIDDEN represents the work of thirty photojournalists who have documented and continue to document animal stories Their exhaustive and in depth work has resulted in some of the most compelling and historic images of animals ever seen Among them are in alphabetical order Aaron Gekoski Aitor Garmendia Amy Jones Andrew Skowron Britta Jaschinski Daniel Beltr Djurattsalliansen Francesco Pistilli Jan van Ijken Joan de la Malla Jo Anne McArthur Jose Valle Kelly Guerin Kristo Muurimaa Konrad Lozinski Louise Jorgensen Luis Tato Murdo MacLeod Paul Hilton Sabine Grootendorst Selene Magnolia Stefano Belacchi Tamara Kenneally and Timo Stammberger The photojournalists featured in Hidden have entered some of the darkest most unsettling places in the world The images they have captured are a searing reminder of our unpardonable behavior towards animals and will serve as beacons of change for years to come Joaquin Phoenix actor I am quite simply in awe of these photographers In a way they are like war photographers except witness to a war that so many people choose to suppress that exists This takes enormous inner strength and bloody minded determination because they cannot save any of the animals that they photograph they can only hope that their photos will help illuminate the mass extermination that unfolds every second of every day across the planet To me they are heroes Not just for one day but over and over and over again Nick Brandt photographer **The Carol J. Adams Reader** Carol J. Adams, 2016-10-06 The Carol J Adams Reader gathers together Adams s foundational and recent articles in the fields of critical studies animal studies media studies vegan studies ecofeminism and feminism as well as relevant interviews and conversations in which Adams identifies key concepts and new developments in her decades long work This volume a companion to *The Sexual Politics of Meat* Bloomsbury Revelations offers insight into a variety of urgent issues for our contemporary world Why do batterers harm animals What is the relationship between genocide and attitudes toward other animals How do activism and theory feed each other How do race gender and species categories interact in strengthening oppressive attitudes In clear language Adams identifies the often hidden aspects of cultural presumptions The essays and conversations found here capture the decades long energy and vision that continue to shape new ways of thinking about and responding to oppression **Rethinking the**

The War against Animals Dinesh Wadiwel, 2015-06-24 Are non human animals our friends or enemies In this provocative book Dinesh Wadiwel argues that our mainstay relationships with billions of animals are essentially hostile The War against Animals asks us to interrogate this sustained violence across its intersubjective institutional and epistemic dimensions Drawing from

Foucault Spivak and Derrida The War against Animals argues that our sovereign claim of superiority over other animals is founded on nothing else but violence Through innovative readings of Locke and Marx Dinesh Wadiwel argues that property in animals represents a bio political conquest that aims to secure animals as the spoils of war The goal for pro animal advocacy must be to challenge this violent sovereignty and recognize animal resistance through forms of counter conduct and truce

Knowing Life Brianne Donaldson, 2025-02-28 Knowing Life examines the limits of dominant knowledge forms that contribute to current practices negatively affecting more than human beings while also exploring alternative approaches

to knowing that are capable of reducing harm and maximizing planetary thriving Specifically this volume seeks multispecies answers to long standing questions in Western philosophy Who or what counts as a knower What kinds of knowing are valid Is knowledge a product of mind body or something else Historically these epistemic questions have been answered in ways that neutralize the knowing and knowledge contribution of and for more than human beings as well as those on the margins of society considered less than human Consequently these epistemic assumptions often support the destruction of ecological habitats industrialization of food animals widespread use of insect and plant toxins water and air pollution climate extinctions ecological militarism and the perpetual flow of living beings used for entertainment research clothing companionship and economic resources In this book crosscultural and multidisciplinary contributors including lesser known global religious philosophical accounts philosophies of plant and insect life race and disability studies laboratory epistemology embodied semiotics and scholar artists challenge and expand these classical concepts through diverse modes of embodied engagement on multispecies knowing toward open futures of planetary co flourishing Feeling Animal Death ,2019-06-20 The emotional exchange between so called humans and more than human creatures is an overlooked phenomenon in societies characterized by the ubiquitous deaths of animals This text offers examples of people across diverse disciplines and perspectives from biomedical research to black theology to art learning and performing emotions expanding their desires discovering new ways to behave and altering their sense of self purpose and community because of passionate but not romanticized attachments to animals By articulating the emotional ties that bind them to specific animals lives and deaths these authors play host to creaturely ghosts who reorient their world vision and work in the world offering examples of affect and feeling needed to enliven multi species ethics **The Politics of Species** Raymond Corbey,Annette Lanjouw,2013-09-05 The assumption that humans are cognitively and morally superior to other animals is fundamental to social democracies and legal systems worldwide It legitimises treating members of other animal species as inferior to humans The last few decades have seen a growing awareness of this issue as evidence continues to show that individuals of many other species have rich mental emotional and social lives Bringing together leading experts from a range of disciplines this volume identifies the key barriers to a definition of moral respect that includes nonhuman animals It sets out to increase concern empathy and inclusiveness by developing strategies that can be used to protect other animals from exploitation in the wild and from suffering in captivity The chapters link scientific data with normative and philosophical reflections offering unique insight into controversial issues around the ethical political and legal status of other species *The Animals' Agenda* Marc Bekoff,Jessica Pierce,2017-04-18 A compelling argument that the time has come to use what we know about the fascinating and diverse inner lives of other animals on their behalf Every day we are learning new and surprising facts about just how intelligent and emotional animals are did you know rats like to play and laugh and also display empathy and the ears and noses of cows tell us how they re feeling At times we humans translate that knowledge into compassion for other animals

think of the public outcry against the fates of Cecil the lion or the captive gorilla Harambe But on the whole our growing understanding of what animals feel is not resulting in more respectful treatment of them Renowned animal behavior expert Marc Bekoff and leading bioethicist Jessica Pierce explore the real world experiences of five categories of animals beginning with those who suffer the greatest deprivations of freedoms and choice chickens pigs and cows in industrial food systems as well as animals used in testing and research including mice rats cats dogs and chimpanzees Next Bekoff and Pierce consider animals for whom losses of freedoms are more ambiguous and controversial namely individuals held in zoos and aquaria and those kept as companions Finally they reveal the unexpected ways in which the freedoms of animals in the wild are constrained by human activities and argue for a more compassionate approach to conservation In each case scientific studies combine with stories of individual animals to bring readers face to face with the wonder of our fellow beings as well as the suffering they endure and the major paradigm shift that is needed to truly ensure their well being The Animals Agenda will educate and inspire people to rethink how we affect other animals and how we can evolve toward more peaceful and less violent ways of interacting with our animal kin in an increasingly human dominated world
