Gender in the Political Science Classroom Ekaterina M. Levintova, Alison Kathryn Staudinger, 2018-07-12 Gender in the Political Science Classroom looks at the roles gender plays in teaching and learning in the traditionally male dominated field of political science The contributors to this collection bring a new perspective to investigations of gender issues in the political behavior literature and feminist pedagogy by uniting them with the Scholarship of Teaching and Learning SoTL The volume offers a balance between the theoretical and the practical and includes discussions of issues such as curriculum class participation service learning doctoral dissertations and professional placements The contributors reveal the discipline of political science as a source of continuing gender based inequities but also as a potential site for transformative pedagogy and partnerships that are mindful of gender While the contributors focus on the discipline of political science their findings about gender in higher education are relevant to SoTL practitioners other social science disciplines and the academy at large

Counting Like a State Philip Rocco, 2025-06-17 The census plays a foundational if all too easily ignored role in the operation of the American state shaping everything from congressional representation to the allocation of trillions of federal dollars While census taking aspires to the high modernist goal of seeing like a state centralizing standardizing and homogenizing knowledge about a polity it is subject to far more conflict and negotiation than final tabulations maps or technical documentation make apparent This is especially true in a large decentralized polity like the United States where the Constitution entrusts the ultimate authority for the census in the legislative branch In *Counting Like a State* Philip Rocco shows how the production of the US Census now crucially hinges not only on what happens in Washington but also on a series of intergovernmental partnerships

State and local officials though not formally responsible for census taking figure importantly in the implementation of the decennial count. These officials are essential partners in the construction and maintenance of address lists as well as in outreach and promotion campaigns in hard to count communities. The 2020 Census compounded these challenges with new crises. Intergovernmental partnerships played a key role in preventing President Trump from adding a citizenship question as state and local officials mounted a coordinated legal counteroffensive. Many local officials also simply refused to cooperate with the Trump administration's efforts to exclude undocumented immigrants from the apportionment count. The census also took place in the context of a global pandemic that stretched administrative resources to the breaking point. While these partnerships allowed the Census Bureau to adapt to ever changing conditions on the ground, state and local governments also sounded the alarm when the Trump administration sought to rush the census. These efforts helped preserve the quality of the data collected in the 2020 count. Rocco's illuminating study of the 2020 Census pulls back the curtain on the administrative state to reveal how something as complex and centralizing as a census takes place within a decentralized federalist system. Drawing on analyses of interviews with hundreds of public officials and quantitative analyses of state and local census activities, *Counting Like a State* allows scholars and practitioners to better understand what facilitates as well as what impedes effective intergovernmental partnerships for census taking.

Norton's Literary Gazette and Publishers' Circular, 1851 Norton's Literary Advertiser, 1853 Economic Governance in Europe Federico Fabbrini, 2016-01-28

The Euro Crisis and the legal and institutional responses to it have had important constitutional implications on the architecture of the European Union. EU: Going beyond the existing literature. Federico Fabbrini's book takes a broad look and examines how the crisis and its aftermath have changed relations of power in the EU, disaggregating three different dimensions: 1) the vertical relations of power between the member states and the EU institutions; 2) the relations of power between the political branches and the courts; and 3) the horizontal relations of power between the EU member states themselves. The first part of the book argues that in the aftermath of the Euro crisis, power has been shifting along each of these axes in paradoxical ways. In particular, through a comparison of the United States, Fabbrini reveals that the EU is nowadays characterized by a high degree of centralization in budgetary affairs, an unprecedented level of judicialization of economic questions, and a growing imbalance between the member states in the governance of fiscal matters. As the book makes clear, however, each of these dynamics is a cause for concern as it calls into question important constitutional values for the EU, such as the autonomy of the member states in taking decisions about

taxing and spending the preeminence of the political process in settling economic matters and the balance between state power and state equality The second part of the book therefore devises possible options for future legal and institutional developments in the EU which may revert these paradoxical trends In particular Fabbrini considers the ideas of raising a fiscal capacity restoring the centrality of the EU legislative process and reforming the EU executive power and discusses the challenges that accompany any further step towards a deeper Economic and Monetary Union *Forthcoming Books* Rose Arny,2001 **PC Mag** ,1990-06-26 PCMag com is a leading authority on technology delivering Labs based independent reviews of the latest products and services Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology
