Severe Weather Warnings: An Interdisciplinary Approach

William Donner, Havidan Rodriguez, Jerald Brotzge, Walter R. Diaz, 2022-08-24 This book offers a comprehensive description and analysis of natural hazard warnings drawing on perspectives from the social sciences physical sciences and interdisciplinary fields such as disaster studies to articulate a distinction between traditional warnings and what might be called interdisciplinary warnings Traditional warnings approach warning technology design and application from a principally scientific and technical perspective Human factors while considered often are of secondary concern Interdisciplinary warnings on the other hand maintain a critical emphasis on the technical merits of warning systems but also ask Will psychological and community factors such as culture and structure shape how the system is used and if so can this information be incorporated into system design preemptively to make it more effective Given the absence of systematic work on interdisciplinary warnings a book length monograph discussing and synthesizing knowledge from the various fields focused on warnings and warning response is of critical importance to both academics and practitioners Broadly conceived the book presents readers with an in depth overview of warnings interdisciplinary research and interdisciplinary collaboration The book holds appeal for a very broad audience scholars practitioners and academic vocational and technical instructors both in University and non University settings It is of interest to academic scholars due to the interdisciplinary treatment of warnings as well as the general presentation of up to date scholarship on warning theory Additionally scholars interested in interdisciplinary work in general and those focusing on disaster warnings find within the volume a framework for developing collaborative research partnerships with those from other disciplines As well the book offers practitioners emergency managers mitigation specialists planners etc a more comprehensive perspective on emergency response in practice allowing for better development and application of warning policy Finally the book appeals to instructors both inside and outside the academy The authors envision the book useful to professors teaching both graduate and undergraduate level courses in Sociology of Disaster Emergency Management Planning Homeland Security Disaster Response Disaster Mitigation and Business Continuity and Crisis Management A robust market also exists among professional organizations perhaps most notably FEMA which offers countless online and in person training courses via the National Training Program Emergency Management Institute EMI and other venues

BSCS Science TRACS G5 Inv. Weather Systems, TE ,1999 Four modules explore topics in physical science earth and space science life science and science and technology with hands on activities designed to engage students in the processes of scientific inquiry and technological design Modules within a developmental level may be taught in any sequence
