Thompson, 2018-07-01 Spanish remains a large and constant fixture in the foreign language learning landscape in the United States As Spanish language study has grown so too has the diversity of students and contexts of use placing the field in the midst of a curricular identity crisis Spanish has become a second rather than a foreign language in the US which leads to unique opportunities and challenges for curriculum and syllabus design materials development individual and program assessment and classroom pedagogy In their book Brown and Thompson address these challenges and provide a vision of Spanish language education for the twenty first century Using data from the College Board ETS and the authors own institutions as well as responses to their national survey of almost seven hundred Spanish language educators the authors argue that the field needs to evolve to reflect changes in the sociocultural socioeducational and sociopolitical landscape of the US The authors provide coherent and compelling discussion of the most pressing issues facing Spanish post secondary education and strategies for converting these

challenges into opportunities Topics that are addressed in the book include Heritage learners service learning in Spanish speaking communities Spanish for specific purposes assessment unique needs for Spanish teacher training online and hybrid teaching and the relevance of ACTFL's national standards for Spanish post secondary education An essential read for Spanish language scholars especially those interested in curriculum design and pedagogy that includes supporting reflection questions and pedagogical activities for use in upper level undergraduate and graduate level courses

Meeting the Challenges to Measurement in an Era of Accountability Henry Braun, 2016-01-29 Under pressure and support from the federal government states have increasingly turned to indicators based on student test scores to evaluate teachers and schools as well as students themselves The focus thus far has been on test scores in those subject areas where there is a sequence of consecutive tests such as in mathematics or English language arts with a focus on grades 4-8 Teachers in these subject areas however constitute less than thirty percent of the teacher workforce in a district Comparatively little has been written about the measurement of achievement in the other grades and subjects This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas with particular attention to their use in the evaluation of teachers and schools in all It addresses traditional end of course tests as well as alternative measures such as portfolios exhibitions and student learning objectives In each case issues related to design and development psychometric considerations and validity challenges are covered from both a generic and a content specific perspective The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform research based applications of educational measurement and assessment Edited by leading experts these books are comprehensive and practical resources on the latest developments in the field The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license
