

Student Device Troubleshooting

First tip is to restart your device

This will often fix any number of issues, including login issues, WIFI issues, and many more. Do NOT just press the power button -- go to the Start menu, click Power, then choose Restart.

Is your internet not working?

First, check in the lower right-hand corner to see if your WIFI is connected. If you see a globe, the WIFI is disconnected. If you see the WIFI symbol, it is connected. To connect, click on the globe and connect to your WIFI (RCS while at school). Another problem may be that you are in Airplane mode. To turn off Airplane mode, click on the WIFI symbol and click on the Airplane mode button.

Are you getting webpage errors?

You may need to clear your browsing history, also called the internet cache. Whether you are using Google Chrome or Microsoft Edge, you can use the shortcut Ctrl + Shift + Del and the dialogue box will open to clear your browsing history. It's best to change the Time Range to "All time." After you've cleared your cache, close the browser and then open a new window and try the website again. This trick clears up a lot of internet problems!

Is your sound not working?

Check to be sure that the speakers/headphones are not muted and that the volume is high enough. You can find the volume icon at the bottom right of your taskbar. You may also go to the search bar at the bottom and search Sound and check under the Playback tab to be sure that the correct audio device is chosen.
