Approach for Resource-Productive Operations Markus Hammer, 2018-07-10 Markus Hammer investigates a time-based and analytics-supported operations management approach. He explores five perspectives: 1. the needs of industry in particular manufacturing in process industries; 2. the impact of digitization with focus on Big Data and analytics; 3. the management of operations through time-based performance metrics; 4. how operations improvement methods and advanced process control help achieve resource-productive operations; and 5. learning from practice based on two empirical case studies. The author conceives, explains and tests an implementation methodology. The final case study proves that the developed implementation methodology works in practice. *Integrated Performance Management* Kurt Verweire, Lutgart Berghe, 2004-12-23 Linking various disciplines and management functions, *Integrated Performance Management* provides the reader with a concrete framework to manage organizations successfully. The authors do not isolate a single strategy to manage performance. Instead, the book focuses on a range of strategies, providing the reader with an introduction to each one. The concepts under analysis were developed through intense dialogue with business managers. While maintaining academic rigour, *Integrated Performance Management* presents ideas that students will find relevant outside of the classroom.
