Practical Jazz Theory for Improvisation Craig Fraedrich,2014-06-09 Practical Jazz Theory for Improvisation is a jazz theory text with an emphasis on improvisation Originally conceived as the Jazz Theory Improvisation text and curriculum for the 2014 National Jazz Workshop it has already been adopted by several university jazz programs This book begins at a level accessible by students just beginning in jazz with reference appendices to fill any fundamental music theory knowledge yet progresses systematically in technical and conceptual content well beyond all but the most advanced college improvisation classes With notated examples and exercises demonstrating all concepts as well free downloadable play along tracks for all exercises this book will have students playing the material almost immediately While not required the available 300 page companion book Practical Jazz Theory for Improvisation Exercise Workbook available in treble and bass clef has all exercises notated in all keys to allow for quicker technical and aural advancement A Guide to Teaching in the Active Learning Classroom Paul Baepler,J. D. Walker,D. Christopher Brooks,Kem Saichaie,Christina I. Petersen,2023-07-03 While Active Learning Classrooms or ALCs offer rich new environments for learning they present many new challenges to faculty because among other things they eliminate the room s central focal point and disrupt the conventional seating plan to which faculty and students have become accustomed The importance of learning how to use these classrooms well and to capitalize on their special features is paramount The potential they represent can be realized only when they facilitate improved learning outcomes and engage students in the learning process in a manner different from traditional classrooms and lecture halls This book provides an introduction to ALCs briefly covering their history and then synthesizing the research on these spaces to provide faculty with empirically based practical guidance on how to use these unfamiliar spaces effectively Among the questions this book addresses are How can instructors mitigate the apparent lack of a central focal point in the space What types of learning activities work well in the ALCs and take advantage of the affordances of the room How can teachers

address familiar classroom management challenges in these unfamiliar spaces If assessment and rapid feedback are critical in active learning how do they work in a room filled with circular tables and no central focus point How do instructors balance group learning with the needs of the larger class How can students be held accountable when many will necessarily have their backs facing the instructor How can instructors evaluate the effectiveness of their teaching in these spaces This book is intended for faculty preparing to teach in or already working in this new classroom environment for administrators planning to create ALCs or experimenting with provisionally designed rooms and for faculty developers helping teachers transition to using these new spaces
