Ethics for Behavior Analysts Mary Burch, 2016-03-22 This fully updated third edition of Jon Bailey and Mary Burch's bestselling *Ethics for Behavior Analysts* is an invaluable guide to understanding and implementing the newly revised Behavior Analyst Certification Board (BACB) Professional and Ethical Compliance Code. Featured in this new edition are case studies drawn from the author's real world practice with hints to guide readers toward the ethical solution and revised chapters including how this new edition evolved alongside the revised Code and tips for succeeding in your first job as a certified behavior analyst. The complete revised BACB Professional and Ethical Compliance Code is included as an appendix. This third edition improves upon what has become a go-to resource for behavior analysts in training and in practice.

Ethical Applied Behavior Analysis Models for Individuals Impacted by Autism Stephanie Peterson, Rebecca Eldridge, Betty Fry Williams, Randy Lee Williams, 2024-07-31 *Ethical Applied Behavior Analysis Models for Individuals Impacted by Autism* provides teachers, parents, and behavior analysts with a comprehensive analysis of evidence-based behavior analytic programs for the therapeutic treatment of persons with autism from infancy through adulthood. Chapters review the characteristics of autism spectrum disorder (ASD), behavior analytic concepts and interventions, and discuss the eight different effective treatment programs, examining each approach's scientific base and value. Fully updated to reflect current research and understanding of autism, this second edition includes new chapters on evaluating high-quality behavior analytic programs as well as explorations of programs covering the verbal behavior approach and those specially designed for adults. *Individuals with Disabilities Education Law Report*, 1997 *Early Childhood Report*, 2007 **A World of Our Own** Aileen McCallan, 2016-05-09 *A World of Our Own* is a mother's account of how autism challenged her family and changed her life. Young mother Aileen McCallan is filled with love and joy at the birth of her second son, Cian. Now she feels she can settle into motherhood and a comfortable life. But it is not to be. From the age of about eighteen months, Cian's behaviour grows increasingly strange; his language fails to develop; he shows little emotional or social connection; he doesn't play with his older brother, Christopher, and he screams and writhes at night, wearing down his parents. They face an endless series of assessments and tests as the truth gradually dawns: Cian has autism. Shocked to discover the lack of support or treatments available for those suffering from autism, Aileen determines to hold onto Cian, to stop her son from slipping away from her. She spends her waking hours working with him and searching for therapists who can connect with him using Applied Behavioural Analysis (ABA). It is an uphill battle that strains Aileen's sanity, her marriage, her world. She feels caught in a world where there is only Cian and her. *A World of Our Own* is a heart-breaking, uncompromising glimpse into a family affected by autism. Ultimately, though, it is a story of the triumph of the human spirit and of the victory of love over despair.

Navigating Ethics in Behavior Analysis R. Nicolle Carr, 2025-11-25

Navigating Ethics in Behavior Analysis considers the elusive topic of ethics in the professional context of behavioral analysis Students often assume their Applied Behavior Analysis Ethics class is going to be an easy A that it takes no more than common sense and a good moral compass to determine the line between right and wrong But as they quickly learn ethics are different from laws morals and common sense and when a variable is modified from how it was originally learned students can be at a loss for how to critically think through the situation Drawing from her extensive experience in both teaching and practice Nicolle Carr highlights the importance of critical thinking when considering questions of ethics in behavior analysis She examines the history and creation of the Behavior Analysis Certification Board's BACB current ethical code before exploring well known and novel approaches to navigating the ethical decision making

process with added emphasis on contextual understanding These approaches are then applied in real world scenarios in schools clinics homes residential facilities higher education and within Organizational Behavior Management Carr concludes by walking the reader through the process of an ethical violation from trying to solve an issue alone and ensuring the person falls under the BACB s jurisdiction to submitting the appropriate documents and what to expect as the process continues Delving into the ethical curiosity created by grey areas that play out daily in the world of behavior analysis this book will be an essential resource for students of behavioral analysis ethics as well as fully certified behavioral analysts
