### **Wealth Building Pyramid Chapter 3:**

The Fortune at the Bottom of the Pyramid, Revised and Updated 5th Anniversary Edition C.K. Prahalad, 2009-07-15

Drawing on Prahalad's breakthrough insights in *The Fortune at the Bottom of the Pyramid*, great companies worldwide have sought to identify and build and profit from new markets amongst the world's several billion poorest people while at the same time helping to alleviate poverty. Five years after its first publication, this book's ideas are no longer theory; they are proven, profitable reality. In the 5th Anniversary Edition, Prahalad thoroughly updates his book to reveal all that's been learned about competing and profiting at the bottom of the pyramid. Prahalad outlines the latest strategies and tactics that companies are utilizing to succeed in the developing world. He interviews several innovative CEOs to discuss what they've learned from their own initiatives, including the Unilever business leader who's built a billion-dollar business in India. You'll find a new case study on Jaipur Rugs' innovative new global supply chain, updates to earlier editions' key cases, and up to the minute information on the evolution of key industries such as wireless agribusiness, healthcare, consumer goods, and finance. Prahalad also offers an up-to-date assessment of the key questions his ideas raised: Is there truly a market? Is there scale? Is there profit? Is there innovation? Is this a global opportunity? Five years ago, executives could be hopeful that the answers to these questions would be positive. Now, as Prahalad demonstrates, they can be certain of it.

Building Wealth Lester C. Thurow, 2009-09-25  
There is no doubt that we are in the middle of a transition to a knowledge-based economy. Breakthrough technologies in microelectronics, biotechnology, new materials, telecommunications, robotics, and computers are fundamentally changing the game of creating wealth. While these new industries are growing explosively, existing industries such as banking and retail are being transformed beyond recognition. As a result, a new global economy is emerging to replace existing national economies. What will it take for individuals, companies, and entire countries to succeed in the new economics of the twenty-first century? Rather than focusing on spending, Lester C. Thurow argues that we must emphasize investment in basic knowledge, education, and infrastructure. Only by committing ourselves to building communal wealth can we maximize opportunities for building personal wealth as well. *Building Wealth* is an indispensable guide to surviving and thriving in the economies of the twenty-first century.
