

How to make a research poster: A guide for students

Many technologies and breakthroughs would not be possible without research. It is important to keep members of the community informed about the latest updates. One way to do that is through research posters.

Introduction

Posters are popular method of presenting research findings in a concise and visually pleasing manner. They are commonly used in conferences and meetings. Start by introducing the subject of your research and/or your hypothesis. What are the questions about this topic that you want to answer? What new things can it contribute to the existing literature?

Objective

It is important for your readers to know what you want to achieve with your research. State this as clear as possible.

Methodology

Let readers know how you did your study. Methods can vary depending on the subject or results you want to see. These methods may include:

- Interviews
- Surveys
- Experimental studies
- Experiments

Remember, if you include a writing handbook that were used as references.

Results/Findings

Results show the outcome of the research and should answer the question of hypothesis stated in the introduction.

- State what you've found from your study.
- Try to show how your findings fit in.

Abstract

Adding an abstract can make your poster more appealing to the reader.

Analysis

Expand on your findings by discussing what methods were used to analyze your data. It can get technical as long as it's simple and direct to the point. Use bullet points for emphasis. Include any graphs, tables, illustrations, and other images that support the study and show a visual analysis of the data. Make sure they are large enough to be seen from a distance but not clutter the poster.

Use illustrations to present your data in a clear form.

Write a poster that is easy to read and visually appealing. Use graphs, tables, and other visual aids to support your data.

Graphs are great in helping readers quickly access to understand.

Conclusion

Summarize your study and let the readers know how to interpret your findings. You can also add a description of how you can grow from the idea of what comes next. The reader can also include any implications of the study and if there are any future or recommendations for future studies.

References

Remember to cite any references you used in your study. These references are provided in your writing handbook.

Abstract

Remember to give your abstract a clear and concise summary of your study. This should be done before you start writing the rest of the poster.

References

Remember to cite any references you used in your study. These references are provided in your writing handbook.

Changing Face of Information: Support Services for Scientific Research David J.

Brown,2020-01-20 The health of scientific enterprise has become a critical political and social issue as nation states tackle austerity diversity global challenges whilst simultaneously supporting a competitive and innovative national economy A key asset in achieving such ambitions is for a scholarly information system which enables the fruits of the research effort to be disseminated efficiently As the information support system struggles with adapting from a print based to a digital process the dysfunctionality current within STEM publishing in particular becomes evident New ways of supporting research are emerging which require a new approach to publishing an approach which takes on board the many demographic social technical and administrative changes taking place in both science itself and society A radical strategic assessment is required and this book tracks key aspects required for any new future strategy This book provides a catalogue of issues to which a future STEM information industry will need to adapt They range from the effects of technology on the neurological processes of research to the growing use of technology to speed up the exchange of information among groups and collaboratories from considerations about quality control yet maintaining intellectual ownership from changing from an elitist STEM system favouring academics to a more democratic process with wider appeal There is the neglected non academic market and its need to share in the results of the research effort often through partnership and being part of a hive mind This is the large world of the unaffiliated knowledge workers of which academia is numerically but a small part The many changes taking place in scholarly information dictate that the future is unlikely to be a smooth and gradual evolution from the past Radical new approaches are required a revolution which takes on board the perfect storm of changes listed in this book Just as such changes have changed the face of industries such as music and retail in recent years so similar dramatic changes are likely to result in a restructuring of STEM into a more technologically focused industry within the next decade The implications for the current STEM stakeholders are profound
