Time to Think Hannah Barnes, 2024-07-02 SHORTLISTED FOR THE BAILLIE GIFFORD PRIZE FOR NON FICTION SHORTLISTED FOR THE ORWELL PRIZE FOR POLITICAL WRITING This is what journalism is for Observer Time to Think goes behind the headlines to reveal the truth about the collapse of the world's largest gender service for children Are we hurting children That's the core question at the heart of Time to Think which exposes the truth about the rise and fall of the United Kingdom's flagship

gender identity clinic for children Answering in the affirmative it exposes how ideology triumphed over evidence within this part of the healthcare system In the process child safeguarding was overlooked and pediatric patients were medically harmed As investigative journalist Hannah Barnes reveals the Tavistock's Gender Identity Development Service GIDS was set up initially to provide talking therapies to young people who were questioning their gender identity But in a little over a decade it referred around two thousand children some as young as nine years old for medication to block their puberty In the same period with ever greater numbers of children in need of treatment the profile of the patients changed from largely pre pubescent boys to mostly adolescent girls who were often contending with other medical and psychological difficulties GIDS was shut down by English health authorities in March 2024 and new services will not be able to prescribe these profound medical interventions Yet GIDS's approach to treating children with gender identity distress was in fact more cautious than that observed in other countries including notably in the United States This urgent scrupulous and dramatic book explains how GIDS was the site of a serious medical scandal As this scandal continues to unfold and even accelerate within other institutions and across countries it is a gripping parable and disturbing cautionary tale for our times *Contemporary Chinese Novels in Translation since 1978* Yun Wu, 2024-10-14 This book aims to complement the traditional focus of translation studies which has primarily centered on translating English into other languages It presents a comprehensive analysis of the reverse translation trajectory exploring the movement of Chinese literature into the core English literary domain The book aims to explore the ideological and sociological dynamics that underlie the translation of contemporary Chinese novels This is achieved through an examination of the translation selection process translation paratexts and the roles of translation agents Case studies are employed to illustrate specific linguistic literary and cultural challenges within translation It dissects the cultural and literary implications of translating genres such as women's writing science fiction and Internet literature The argument presented is that the translation of peripheral literature is indispensable in shaping global literature Beyond its literary implications the book identifies the political significance inherent in such reverse translation endeavors It suggests that the translation of Chinese literature holds notable political interest for the Chinese government which aims to reshape China's image and bolster the nation's soft power through literary translation This work will be an essential read to students and scholars of translation studies comparative literature and Chinese studies *Great Circles* Emily Rolfe Grosholz, 2018-11-13 This volume explores the interaction of poetry and mathematics by looking at analogies that link them The form that distinguishes poetry from prose has mathematical structure lifting language above the flow of time as do the thoughtful ways in which poets bring the infinite into relation with the finite The history of mathematics exhibits a dramatic narrative inspired by a kind of troping as metaphor opens metonymy and synecdoche elaborate and irony closes off or shifts the growth of mathematical knowledge The first part of the book is autobiographical following the author through her discovery of these analogies revealed by music architecture science fiction philosophy and the study of mathematics and

poetry The second part focuses on geometry the circle and square launching us from Shakespeare to Housman from Euclid to Leibniz The third part explores the study of dynamics inertial motion and transcendental functions from Descartes to Newton and in 20th c poetry The final part contemplates infinity as it emerges in modern set theory and topology and in

contemporary poems including narrative poems about modern cosmology **Professional Journal of the United States Army** ,2008 Inspiring Stories in Chinese LYDIA LIN,2022-08-22 This is another helpful language learning book produced
