[Data Management in Large-Scale Education Research](#) Crystal Lewis, 2024-07-09 Research data management is becoming more complicated Researchers are collecting more data using more complex technologies all the while increasing the visibility of our work with the push for data sharing and open science practices Ad hoc data management practices may have worked for us in the past but now others need to understand our processes as well requiring researchers to be more thoughtful in planning their data management routines This book is for anyone involved in a research study involving original data collection While the book focuses on quantitative data typically collected from human participants many of the practices covered can apply to other types of data as well The book contains foundational context instructions and practical examples to help researchers in the field of education begin to understand how to create data management workflows for large scale typically federally funded research studies The book starts by describing the research life cycle and how data management fits within this larger picture The remaining chapters are then organized by each phase of the life cycle with examples of best practices provided for each phase Finally considerations on whether the reader should implement and how to integrate those practices into a workflow are discussed

Key Features Provides a holistic approach to the research life cycle showing how project management and data management processes work in parallel and collaboratively Can be read in its entirety or referenced as needed throughout the life cycle Includes relatable examples specific to education research Includes a discussion on how to organize and document data in preparation for data sharing requirements Contains links to example documents as well as templates to help readers implement practices

Identity Management Design Guide with IBM Tivoli Identity Manager Axel Buecker, Dr. Werner Filip, Jaime Cordoba Palacios, Andy Parker, IBM Redbooks, 2009-11-06 Identity management is the concept of providing a unifying interface to

manage all aspects related to individuals and their interactions with the business. It is the process that enables business initiatives by efficiently managing the user life cycle including identity resource provisioning for people users and by integrating it into the required business processes. Identity management encompasses all the data and processes related to the representation of an individual involved in electronic transactions. This IBM Redbooks publication provides an approach for designing an identity management solution with IBM Tivoli Identity Manager Version 5.1. Starting from the high level organizational viewpoint, we show how to define user registration and maintenance processes using the self registration and self care interfaces as well as the delegated administration capabilities. Using the integrated workflow, we automate the submission approval processes for identity management requests and with the automated user provisioning, we take workflow output and automatically implement the administrative requests on the environment with no administrative intervention. This book is a valuable resource for security administrators and architects who wish to understand and implement a centralized identity management and security infrastructure.
