The Crash of Ethiopian Airlines Flight 409* Hans Griffioen, editor,2012-04 On 25 January 2010 at 00 41 30 UTC Ethiopian Airlines flight ET 409 a Boeing 737 800 on its way from Beirut to Addis Abeba crashed just after take off from Rafic Hariri International Airport in Beirut Lebanon into the Mediterranean Sea about 5 NM South West of Beirut International Airport All 90 persons on board were killed in the accident The investigation concluded that the probable causes of the accident were pilot errors due to loss of situational awareness Ethiopian Airlines refutes this conclusion Other factors that could have lead to probable causes are

the increased workload and stress levels that have most likely led to the captain reaching a situation of loss of situational awareness similar to a subtle incapacitation and the F O failure to recognize it or to intervene accordingly Ethiopian Airlines refutes the investigation According to the airline the final report was biased lacking evidence incomplete and did not present the full account of the accident **Aeronautical Engineering** ,1991 A selection of annotated references to unclassified reports and journal articles that were introduced into the NASA scientific and technical information system and announced in Scientific and technical aerospace reports STAR and International aerospace abstracts IAA *Aerodynamic Design of Transport Aircraft* Tobie van den Berg,2009-04-15 The origin of Aerodynamic Design of Transport Aircraft stems from the time when the author was appointed part time professor in the Aerospace Faculty of Delft University of Technology At the time his main activities were those of leading the departments of Aerodynamics Performance and Preliminary Design at Fokker Aircraft Company The groundwork for this book started in 1987 as a series of lecture notes consisting mainly of pictorial material with a minimum of English explanatory text After the demise of Fokker in 1996 one feared that interest in aeronautical engineering would strongly diminish As a result of this the course was discontinued and the relationship between the author and the faculty came to an end Two years later the situation was reappraised and the interest in aeronautical engineering remained so the course was reinstated with a former Fokker colleague Ronald Slingerland as lecturer The lecture notes from these courses form the foundation of this publication
