Mathematical Psychology in Progress Edward E. Roskam,2012-12-06 This volume is the third volume of papers originating from the European Mathematical Psychology Group Earlier volumes were E Degreef J van Buggenhaut Eds Trends In Mathematical Psychology Amsterdam North Holland Publ Cy 1984 and E E Roskam R Suck Eds Progress in Mathematical Psychology Amsterdam Elsevier Science Publ As the title indicates this volume presents work in progress which was reported in one of the recent annual meetings of the European Mathematical Psychology Group The Group finds it worthwhile to disseminate this work using a review process which is somewhat less strict and a publication lag which is shorter than would be the case for standard international journals The editor is happy that the meetings of the European Mathematical Psychology Group are regularly attended by colleagues from overseas Their contributions also appear in this volume as was the case in earlier volumes Despite apparent heterogeneity the reader will observe that European mathematical psychologists have a keen interest in basic issues of mathematical modeling and measurement

theory and that also substantive topics such as decision making perception and performance are studied in the context of formal modeling Also and perhaps of more than casual importance for future developments is the fact that theory experiment and data analysis go closely together It should therefore not surprise that psychometric topics and topics in scaling are represented in this volume alongside with topics of a more purely mathematical nature
