Situated at the crossroads of visual culture and consumerism this essay collection examines visual merchandising as both a business and an art It seeks to challenge that scholarly ambivalence that often celebrates the spectacle but denies the agenda of consumerism The volume considers strategies in the imaging of selling from the mid nineteenth century to the present in terms of the visual interaction that occurs between the commodity and the consumer and between body and space Under the categories of Promotion Product and Place contributors to the volume examine the strategies in the presentation of retail goods and environments that range from print advertising to product design to store display and architecture **Visual Merchandising The Image of Selling** is located directly at the nexus of business practice and cultural myth where the spectator never loses sight of their status as buyer and the object of desire is always still a commodity **Point of Sale**

Daniel Herbert, Derek Johnson, 2019-12-13 **Point of Sale** offers the first significant attempt to center media retail as a vital component in the study of popular culture It brings together fifteen essays by top media scholars with their fingers on the pulse of both the changes that foreground retail in a digital age and the history that has made retail a fundamental part of the culture industries The book reveals why retail matters as a site of transactional significance to industries as well as a crucial locus of meaning and interactional participation for consumers In addition to examining how industries connect books DVDs video games lifestyle products toys and more to consumers it also interrogates the changes in media circulation driven by the collision of digital platforms with existing retail institutions By grappling with the contexts in which we buy media **Point of Sale** uncovers the underlying tensions that define the contemporary culture industries **One Nation Under**

are currently unable to turn a swelling tide of economic and technological evolution and land consolidation into reversion, stratification and contagious decline. It uses these lessons to offer concrete locational programming design and management strategies to maximize street level interaction and trust between street level architecture, its inhabitants and the city. This book demonstrates that designers, developers, planners and managers ultimately have to create the right preconditions for inhabitants and passersby to bring frontages to life. These preconditions connect architecture to its urban, social, economical and technological context. Only the right frontage in the right context with the right design, the right inhabitation and the right attitude to the city will become part of the ecosystem of trust and interaction that supports public life. This book empowers the many participants in this ecosystem to build, inhabit and enjoy truly urbane architecture. **Interior Design**

Roderick Adams, 2020-06-09. As the globe shrinks and the concept of distance diminishes, this text challenges the current status quo by identifying the cohesions and specialisations of design communities across the continents. It sets out an international spatial design landscape, identifying and contouring global design practice and design hotspots from a range of case studies, interviews and design practice perspectives. Using a range of interior environments, the chapters link the origins, trends and perceptions of the interior to create new insight into trans-global design. The book expands but also coheres the interior design discipline to ensure the subject continues to grow, develop and influence the inhabitations of the world. The book features a wealth of pedagogical elements including beautifully designed, with over 100 full colour illustrations, photographs and examples of design work. Maps and diagrams which highlight hotspots of design across the globe, providing strong graphic information. Interview panels featuring professional insights from designers across the globe. Employability boxes providing a good tips guide for students gaining employment across the globe. International Dimension boxes which strengthen the scholarship of studying interior design in a globalised way. Design Oddities box which brings into focus any new or contextual facts that help contextualise the global interior. **Swipe, Scan, Shop** Kate Schaefer, 2021-03-11

Successful fashion merchandising, branding and communication start with satisfyingly sensory and interactive shopping experiences. With Kate Schaefer's beautifully illustrated and practical book, learn how retailers create these experiences to connect with shoppers, enhance the retail experience and achieve brand loyalty. With company highlights from brands such as Amazon Go, FIT, MATCH and Sephora, Swipe Scan Shop shows how fashion retailers are embracing the omnichannel retail experience by using virtual and augmented reality, beacon technologies and facial recognition among others. As shoppers become more dependent on digital devices as part of their shopping experience, visual merchandisers are adapting by incorporating mobile tech to tell a story, alert shoppers of product locations and inventory levels and allow for the customization of products and sharing with friends. With a companion website that includes resources and links to further information and videos discussed in the book, this practical guide shows how to inform, entice and engage customers by incorporating social technology throughout the shopping experience. **Resources in Education**, 1981 Virginia State
