African football migration Paul Darby,James Esson,Christian Ungruhe,2022-01-25 The global success of football icons like Samuel Eto o Didier Drogba and Mohamed Salah has fuelled the migratory projects of countless young men across the African continent who dream of following literally and figuratively in their footsteps Drawing on over a decade of ethnographic research *African football migration* captures and chronicles the aspirations experiences and trajectories of those pursuing this highly prized form of transnational migration In doing so the book uncovers and traces the myriad actors networks and institutions that affect the ability of young people across the continent to realise social mobility through football s global production network The book sheds critical light on the barriers to social mobility erected by neoliberal capitalism and how these are negotiated by aspiring African footballers It also generates original interdisciplinary perspectives on the complex interplay between structural forces and human agency as young players navigate an industry rife with commercial speculation While a select few reach the elite levels of the game and build a successful career overseas the book vividly illustrates how for the vast majority trying their luck through football results in involuntary immobility in post colonial Africa These findings are complemented by rare empirical insights from transnational African migrants at the margins of the global football industry and those navigating precarious retirement from careers as players *African football migration* offers essential coverage of why and how African youth and young men have become actors in the global football industry revealing the complex implications of transnational mobility both imagined and enacted

Sports-Related Concussions in Youth National Research Council,Institute of Medicine,Board on Children,

Youth, and Families, Committee on Sports-Related Concussions in Youth, 2014-02-04 In the past decade few subjects at the intersection of medicine and sports have generated as much public interest as sports related concussions especially among youth Despite growing awareness of sports related concussions and campaigns to educate athletes coaches physicians and parents of young athletes about concussion recognition and management confusion and controversy persist in many areas Currently diagnosis is based primarily on the symptoms reported by the individual rather than on objective diagnostic markers and there is little empirical evidence for the optimal degree and duration of physical rest needed to promote recovery or the best timing and approach for returning to full physical activity Sports Related Concussions in Youth Improving the Science Changing the Culture reviews the science of sports related concussions in youth from elementary school through young adulthood as well as in military personnel and their dependents This report recommends actions that can be taken by a range of audiences including research funding agencies legislatures state and school superintendents and athletic directors military organizations and equipment manufacturers as well as youth who participate in sports and their parents to improve what is known about concussions and to reduce their occurrence Sports Related Concussions in Youth finds that while some studies provide useful information much remains unknown about the extent of concussions in youth how to diagnose manage and prevent concussions and the short and long term consequences of concussions as well as repetitive head impacts that do not result in concussion symptoms The culture of sports negatively influences athletes self reporting of concussion symptoms and their adherence to return to play guidance Athletes their teammates and in some cases coaches and parents may not fully appreciate the health threats posed by concussions Similarly military recruits are immersed in a culture that includes devotion to duty and service before self and the critical nature of concussions may often go unheeded According to Sports Related Concussions in Youth if the youth sports community can adopt the belief that concussions are serious injuries and emphasize care for players with concussions until they are fully recovered then the culture in which these athletes perform and compete will become much safer Improving understanding of the extent causes effects and prevention of sports related concussions is vitally important for the health and well being of youth athletes The findings and recommendations in this report set a direction for research to reach this goal **The Youth Athlete** Brian J.
