Mediating Role of Social Media on Youth's Psychological Well-Being Ashwini Kothambikar, 2023-06-22 This book is the result of a collaboration between a human editor and an artificial intelligence algorithm to create a machine generated literature overview of research articles analyzing the mediating role of social media on the psychological wellbeing of youth. It's a new publication format in which state of the art computer algorithms are applied to select the most relevant articles published in Springer Nature journals and create machine generated literature reviews by arranging the selected articles in a topical order and creating short summaries of these articles. In this volume, a human counsellor/psychologist used the algorithm to explore articles that present results of research about the impacts of social media on the psychological wellbeing of youth. The Internet has always been popular among youth, but during the pandemic, it has attracted even more attention since many aspects of life further migrated to the digital world, thus adding substantially to the Internet's ever increasing popularity. Today, youth spend a majority portion of their time on the Internet and an increasing amount on social media. In such digitally dependent times, this book attempts to provide insights on the positive and negative impact of the Internet and social media on youth mental health and also provides specific observations on personality traits.
