to Teaching thoroughly prepares students to make a difference as teachers presenting first hand stories and evidence based practices while offering a student centered approach to learning Time's Up! Keith Farnish, 2009 From the Publisher People know that the climate is changing for the worse that species are being driven to extinction at a rapidly increasing rate and that entire ecosystems are becoming shadows of their former richness They know but they do not understand The global environmental crisis is closing in on humanity from all directions yet the crisis barely registers on this culture s list of problems As we stand around humanity is doomed to a collapse that may leave only a few nomads and a toxic barely survivable Earth in its wake So why is nothing being done beyond changing light bulbs recycling and buying organic food It s certainly not for a lack of good reasons Humans have no motivation stronger than survival yet the culture that dominates the culture we call industrial civilization has created a set of priorities that values financial wealth the possession of superfluous goods and short cheap thrills above that most basic need In short we are prepared to die in order to live a life that is killing us Time s Up is about changing our behavior The book describes how our actions affect the very things on Earth that we depend on for survival at scales that we rarely contemplate It arms us with the tools to free us from a culture that has blinded us for centuries and which will allow us to live in a way that will give Earth and ourselves a viable future
