Virtual Business Simulation New Career Project:

Managing Business Projects Frank Einhorn, 2022-11-23 Managing Business Projects The Essentials differs from many other project management textbooks. Foremost it is about business projects as opposed to construction or engineering projects. Although many techniques like schedule management apply to both, they are usually applied differently. As its title conveys, the book explains the essential techniques and perspectives needed for business projects to be successful. The focus is on small and medium-sized projects up to 20 million but often below 1 million. Some literature favors large and mega projects, but for every mega project there are many thousands of smaller projects that are vital to the organization and could involve considerable complexity and risk. Nevertheless, the techniques outlined here also apply to mega projects and their many subprojects; they even apply to some aspects of construction or engineering projects. This book does not aim to cover all project management techniques. In real life, there is simply no time for sophisticated should-dos. Rather, it covers the essentials that apply to almost all business projects; these are unlikely to change in the future even as technology and methodologies advance. The driving idea, which is stated repeatedly, is to do the essentials and to do them consistently and well. Strong emphasis is placed on things that happen before, around, and after the project itself. So while the basic disciplines like engaging with stakeholders, managing scope, schedules, costs, risks, issues, changes, and communication are thoroughly explained, other important aspects are covered. These include governance of a project and of a portfolio of projects, project selection with its financial and non-financial aspects, effective use of the business case through to benefits realization, procurement, outsourcing, and partnership, and also the agile mindset that is valuable beyond agile projects. Besides project managers and sponsors, this book is intended for people who are working in business or government at any level or for MBA students. It offers perspectives that enable them to learn more from their everyday experience. It is not aimed at undergraduate students, although many would benefit from the contents.

Mobility for Smart Cities and Regional Development - Challenges for Higher Education Michael E. Auer, Hanno Hortsch, Oliver Michler, Thomas Köhler, 2022-01-28 This book presents recent research on interactive collaborative learning. We are currently witnessing a significant transformation in the development of education and especially post-secondary education. To face these challenges, higher education has to find innovative ways to quickly respond to these new needs. On the one hand, there is a pressure by the new situation in regard to the COVID pandemic. On the other hand, the methods and organizational forms of teaching and learning at higher educational institutions have changed rapidly in recent months. Scientifically based statements as well as excellent experiences and best practice are absolutely necessary. These were the aims connected with the 24th International Conference on Interactive Collaborative Learning (ICL2021) which was held online by Technische Universität Dresden, Germany, on 22-24 September 2021. Since its beginning in 1998, this conference is devoted to new approaches in learning with a focus on collaborative learning in Higher Education. Nowadays, the ICL conferences are a forum for the exchange of

relevant trends and research results as well as the presentation of practical experiences in Learning and Engineering Pedagogy In this way we try to bridge the gap between pure scientific research and the everyday work of educators This book contains papers in the fields of Teaching Best Practices Research in Engineering Pedagogy Engineering Pedagogy Education Entrepreneurship in Engineering Education Project Based Learning Virtual and Augmented Learning Immersive Learning in Healthcare and Medical Education Interested readership includes policymakers academics educators researchers in pedagogy and learning theory schoolteachers learning industry further and continuing education lecturers etc
