Child's Play Re-envisioned through Virtual Reality

Rene Novak, 2025-06-12 In this book Dr Rene Novak reveals new ways of understanding children's play by liberating it from the constraints of standardised educational agendas. Drawing on Heidegger's concepts of Enframing and poiesis and phenomenological inquiry, this innovative study explores how immersive virtual reality VR videos can serve as metaphysical laboratories. Through vivid embodied experiences, early childhood educators cross the cybernetic looking glass to become one with play and discover transformative insights for holistic child development. Dr Rene Novak investigates the potential of immersive pedagogy by merging visual pedagogy with embodiment theory to highlight the critical role of teacher presence in educational phenomena. Educators become invisible observers stepping inside the flow of play while relinquishing preconceived enframings, discourses, and misconceptions. The result is a reshaping of pedagogy and policy steering away from prescriptive goals toward play as a self-actualising educational experience. By reconceptualising how free play unfolds, this book challenges educators, policymakers, and parents to embrace the true essence of play in early learning. This book is an essential resource for anyone seeking to understand how to foster creativity, social-emotional growth, and deeper engagement in a play-based curriculum.

Virtual Pedophilia Gillian Harkins, 2020-04-10 In *Virtual Pedophilia* Gillian Harkins traces how by the end of the twentieth century the pedophile as a social outcast evolved into its contemporary appearance as a virtually normal white male The pedophile s alleged racial and gender normativity was treated as an exception to dominant racialized modes of criminal or diagnostic profiling The pedophile was instead profiled as a virtual figure a potential threat made visible only when information was transformed into predictive image The virtual pedophile was everywhere and nowhere slipping through day to day life undetected until people learned how to arm themselves with the right combination of visually predictive information Drawing on television movies and documentaries such as *Law and Order SVU To Catch a Predator Mystic River* and *Capturing the Friedmans* Harkins shows how diverse U S audiences have been conscripted and trained to be lay detectives who should always be on the lookout for the pedophile as virtual predator In this way the perceived threat of the pedophile legitimated increased surveillance and ramped up legal strictures that expanded the security apparatus of the carceral state
