Electricity

We use electricity every day, but what is it and how does it work? Where do we get electricity from and what do we use it for? Find out to explore all about electricity.

What is electricity?

Electricity is the flow of an electric current. It is a movement of electrical charge.

Electricity can be seen in nature, like lightning, or we can generate it to power things we use every day, like televisions, light bulbs and fridges.

A more complex explanation of electricity is that it is a flow of electrons (a type of very tiny thing (piece of matter) that we call a particle). They are electrically charged and when they move, we get an electric current. Think of a river and the water flowing in it. The water flowing is a bit like the flow of electrons. If you have faster flowing water, you have a greater current.

All of the following images relate to electricity. Can you say what each picture shows? How are they linked to electricity?
