South Australia: State of Transformation John Spoehr,2018-11-14 South Australia and the world is entering a time of transformational change social economic industrial and environmental As a new government takes the reins it has the power to shape the future of our state and its citizens at a crucial moment The automotive industry has closed but maritime shipbuilding projects are booming Automation and artificial intelligence technologies are on the rise and with them both fears of jobs lost and the promise of increased productivity and wellbeing Which way will we go In this insightful collection of essays some of South Australia s leading policy thinkers consider our future in the context of jobs our economy and its drivers industrial relations law and order the environment education health including ageing and aged care and more

Changing Australian Education Alan Reid,2020-07-28 Australian education policy for the past 40 years has been heading in the wrong direction and is entirely unsuitable for preparing young people for the 21st century Exaggeration Sadly not For a teacher there is nothing more exhilarating than encouraging young people to realise the power of learning But in our schools today teachers spend so much time preparing their students for high stakes tests gathering data and filling in forms that many of them feel like the life has been squeezed out of their role Schooling has been turned into a market and school leaders are forced to spend precious time and resources competing with other schools Their professional experience is disregarded as policy makers turn to the corporate world and self appointed commentators to determine curriculum and school funding The outcome Our schooling system is becoming more segregated children from poorer backgrounds are falling behind public schools are starved of funds and good teachers are leaving One of the most highly regarded educational leaders in Australia Alan Reid argues it s time to reconsider the purposes of education the capacities we need for the future and the strategies that will get us there He outlines a new narrative for Australian schooling that is futures focused and prizes flexibility adaptability collaboration and agility with students teachers and school communities at centre stage A provocative and persuasive argument for the necessity of a new narrative for Australian schooling so as to meet better the demonstrable demands of the twenty first century Emeritus Professor Bob Lingard The University of Queensland At the heart

of the book is a penetrating critique of neoliberalism and the damaging effects it is having on education and society It should be essential reading for policy makers educators parents and anyone interested in the current state of Australian education Professor Barry Down Murdoch University [Helping Children Learn Mathematics, 5th Australian Edition](#) Robert Reys, Mary Lindquist, Diana V.
