Recovering from a First Episode of Psychosis Chris Jackson, Eleanor Baggott, Mark Bernard, Ruth Clutterbuck, Diane Ryles, Erin Turner, 2019-05-07 Despite years of research debate and changes in mental health policy there is still a lack of consensus as to what recovery from psychosis actually means how it should be measured and how it may ultimately be achieved In *Recovering from a First Episode of Psychosis An Integrated Approach to Early Intervention* it is argued that recovery from a first episode of psychosis FEP is comprised of three core elements

symptomatic social and personal Moreover all three types of recovery need to be the target of early intervention for psychosis programmes EIP which provide evidence based integrated bio psychosocial interventions delivered in the context of a value base offering hope empowerment and a youth focused approach Over the 12 chapters in the book the authors all experienced clinicians and researchers from multi professional backgrounds demonstrate that long term recovery needs to replace short term remission as the key target of early psychosis services and that to achieve this we need a change in the way we deliver EIP one that takes account of the different stages of psychosis and the bespoke targeting of integrated medical psychological and social treatments during the critical period Illustrated with a wealth of clinical examples this book will be of great interest to clinical psychologists psychiatrists psychiatric nurses and other associated mental health professionals From the Eyes of Recovery Anthony D. right side of my body I'm easily startled and my head is a bit bigger than most because of extra fluid around my brain. Despite my disability and the daily issues that come along with it, I've always enjoyed writing. I began writing short stories in elementary school. My very first stories were titled *Cheetahs*, *The Magic Unicorn*, and *The Flying Turtle*. I loved elementary school. The teachers and my friends always encouraged me to keep writing and to make the most of my creative abilities. As time passed, I began exploring other forms of writing, particularly poetry. From middle school on, I was complimented on the creativity expressed in my writing. Not only did I enjoy writing, it was the one avenue that allowed me to truly express myself, whether I was writing down my thoughts, feelings, or just losing myself in a world of my own creation. In my writing, I learned I had no limitations. At least that's what I thought at the time. A year after I graduated high school, I enrolled in an English course at Macomb Community College. I did all right, but it was very difficult to face the fact that I didn't fully grasp all areas of writing, as well as thought I had. After all this time, I struggled with grammar and sentence structure. There were many times I became discouraged because I had such a difficult time with basic writing principles. It was tough, but it was a good learning experience. My professor really worked with me. In fact, he approached me after class and asked if I'd consider writing a biography. I was flattered that he thought so highly of my writing. I was also very grateful for the opportunity he was offering me, but that just wasn't something I wanted to do at the time, and I respectfully declined. I decided then to take a break from academics. The long days on campus took a toll on me mentally and physically. During this time, I became acquainted with a woman named Linda Oleszko, who ran a small animal rescue known as *Tiny Paws Rescue*. I was curious to know what it was all about, so I began inquiring. Near the end of our conversation, she said if you'd like, you could come volunteer for a day. That way, you'd be able to check things out yourself. I was hesitant at first, but I took her up on the offer. Not long after, I became a regular among the rest of the volunteers. It was unbelievable. I had always wanted to work with animals since I was a little child. Now, this childhood dream had become a reality. You see, I was often told that the chronic pain, weakness, my mom took me to the doctor. They performed several tests, but didn't find any evidence of an illness. We visited many other doctors in an attempt to get some answers. Unfortunately, they weren't able to find any evidence of an illness, either. After some time, I was finally diagnosed with a bacterial infection called *pseudomonas*.
