physical and mental condition supplemented by great medical care and everything else I can learn or think of is partially responsible for my success in living beyond the average life span for my particular fatal disease We cannot know which weapon or how much each one contributes to the extension of life so we must use them all The doctors all say that cancer survival is very unpredictable and I figured that many of the positive outcomes must depend on how comprehensively and how hard the individual fights So I immediately started this book and organized my fight I was extremely unfortunate most prostate cancer either is so slow growing or eliminated by removal that survivors live for many years In my case it had already spread or metastasized to the bones prior to the operation and that cancer is inoperable and incurable But some people in that condition die very early while others like me live much longer This is highly unpredictable in individual cases due to variation in patient condition treatment effectiveness and other unknowns More than half of all people newly diagnosed with cancer will be cured or given extended remission They will die of something else Of the other half a large number have treatable cancer and they still have many years to live The remainder probably including me have learned that they have incurable cancer that has grown too strong or spread and taken root in such places that it cannot be killed or removed and death is likely in the next few months or years Nevertheless normally incurable cancer and conventional predictability sometimes fail and others may prolong life by fighting with strong mental and physical effort As the disease progresses and is treated and science advances sometimes in great leaps we are rarely sure of which group we are in That uncertainty that hope and the dreadful power of cancer call for great strength of character and effort in both patients and those around them This book is about that The animal instinct to survive is in humans alone expanded in our unique cortex to something much greater the intelligent understanding of self awareness and an intense desire to prolong the experience growth and emotion of life The human spirit beyond the mere motivation of existence is largely responsible for all that our species has conquered and achieved It is an essential quality to be trained treasured and put to use and one of the finest ways is to survive continue and improve our exceptional life through our collective and individual intellect In the last century medical science the visibility of living in distant years and the recognition that we are and can be responsible for increasing our own longevity have ad
