Straw Dogs Thoughts On Humans And Other Animals:

Straw Dogs John Gray,2007-10-16 A radical work of philosophy which sets out to challenge our most cherished assumptions about what it means to be human John Gray explores how the world and human life look once humanism has been finally abandoned *Loss and the Other in the Visionary Work of Anna Maria Ortese* Vilma DeGasperin,2014-03 Combines theme and genre analysis in a study of the Italian author from her first literary writings in the 1930s to her novels in the 1990s *Creaturely Theology* David Clough,2013-02-11 Creaturely Theology is a ground breaking scholarly collection of essays that maps out the agenda for the future study of the theology of the non human and the post human A wide range of first rate contributors show that theological reflection on non human animals and related issues are an important though hitherto neglected part of the agenda of Christian theology and related disciplines The book offers a genuine interdisciplinary conversation between theologians philosophers and scientists and will be a standard text on the theology of non human animals for years to come Contributors include Esther D Reed Exeter Rachel Muers Leeds Stephen Clark Liverpool Neil Messer Lampeter Peter Scott Manchester Michael Northcott Edinburgh Christopher Southgate Exeter **The Conspiracy against the Human Race** Thomas Ligotti,2018-10-02 In Thomas Ligotti s first nonfiction outing an examination of the meaning or meaninglessness of life through an insightful unsparing argument that proves the greatest horrors are not the products of our imagination but instead are found in reality There is a signature motif discernible in both works of philosophical pessimism and supernatural horror It may be stated thus Behind the scenes of life lurks something pernicious that makes a nightmare of our world His fiction is known to be some of the most terrifying in the genre of supernatural horror but Thomas Ligotti s first nonfiction book may be even scarier Drawing on philosophy literature neuroscience and other fields of study Ligotti takes the penetrating lens of his imagination and turns it on his audience causing them to grapple with the brutal reality that they are living a meaningless nightmare and anyone who feels otherwise is simply acting out an optimistic fallacy At once a guidebook to pessimistic thought and a relentless critique of humanity s employment of self deception to cope with the pervasive suffering of their existence *The Conspiracy against the Human Race* may just convince readers that there is more than a measure of truth in the despairing yet unexpectedly liberating negativity that is widely considered a hallmark of Ligotti s work *The Politics of the Human* Anne Phillips,2015-03-19 An elegant and forceful argument that represents the claim to equality as central to the meaning of being human *Affective Communities* Leela Gandhi,2006-01-11 Investigates friendships between anti colonial Indians and anti imperial westerners in late 19th and early 20th centuries claiming that such inter cultural collaborations need to be added to annals of non violent historiography *Animal Lives Matter* Raymond Wacks,2024-02-13 *Animal Lives Matter* provides a comprehensive analysis of the legal philosophical and ethical aspects of animal rights It argues that the subject extends beyond the matter of our obligations towards animals to include our wider responsibilities for protecting the environment Drawing on numerous moral political

legal religious and philosophical theories including utilitarianism deontology rights theory social contractarianism and the capabilities approach the author meticulously examines the questions of sentience speciesism personhood and human exceptionalism Lucid nuanced and academically rigorous this important book will be an essential resource for scholars of law politics philosophy ethics as well as policy makers and the general reader **The Earth Is Our Home** Nelson

Rivera,2016-11-14 This book demonstrates that Mary Midgley s philosophy of evolution points the way towards considering the earth as our only true home since we are products of this planet and its evolving and complex life along with every other organism From the knowledge of ourselves as knowing animals with a biological as well as a cultural history Midgley proposes the elaboration of an evolutionary epistemology that situates us firmly on the earth together with other creatures while at the same time helping us to build knowledge of the world from the complexity of the human experience I like to call this approach by a known theological analogy a view from below that is from the underside of the world from the realms of nature and history Such an approach does not begin by assuming conceptions of design or order in nature a view that we term from above although it does not rule out the possibility of teleological or metaphysical constructions of reality in the long run This down to earth approach I consider essential for any philosophy or theology that wants to take evolutionary theory seriously while committed to a proper and non dismissive assessment of religious views **A Short History of**

Secularism Graeme Smith,2007-11-28 What does it mean to call Western society secular What is secularism And how should we understand the concept of secularism in international relations particularly the clash between radical Islam and the West The Latin term from which the word secular is derived saeculum means generation or age and came to mean that which belongs to this life to the here and now in this world It is widely used as a shorthand for the ideology which shapes contemporary society without reference to the divine However according to Graeme Smith secularism represents a great deal more He offers a radical reappraisal of the notion of secularism and its history beginning with the Greeks and proceeding to modernity and the contemporary period The assumption that the West is becoming increasingly secular is often unquestioned By contrast Dr Smith discerns a different kind of society one informed by a historical legacy which makes sense only when it is appreciated that it is religious Secularism was born of Christianity Daringly and very originally Smith argues that it is impossible to understand the idea of the secular without appreciating that at root it is Christian A Short History of Secularism will fundamentally reshape discussions of western culture religion and politics It will have strong appeal to students of religion political philosophy and the history of ideas **Beyond Liberalism** Michael K.

Briand,2019-06-14 This book shows how the United States can begin dealing with the most difficult and intractable political issues that afflict liberal democracy today by initiating an inclusive public practice of ethical dialogue and deliberation Beyond Liberalism argues that there is a flaw in liberalism the doctrine of individualism Specifically the defect consists in two distinct ideas atomism and subjectivism These ideas underpin the principle of freedom which is our default method for

making personal choices and resolving interpersonal disagreements but contains no standard for determining what might be worth doing and hence no criteria for assigning relative priority to values in conflict Objective ethical judgments can be achieved however if we understand that insofar as they support the fulfillment of empirically identified human needs statements about good and bad are propositions of a factual nature A conception of the good for human beings is implicit in the fulfillment of those needs To articulate that conception we need a constructive productive public practice of ethical dialogue and deliberation To build such a practice will require what amounts to a life of ethical heroism This book seeks to encourage that sort of life

Born to Wonder Alister McGrath, 2020-08-04 In *Born to Wonder* Alister McGrath a prolific Oxford scholar scientist and theologian explores the deepest mystery at the heart of life itself Life is a gift We never asked to be born Yet here we are living in this strange world of space and time trying to work out what it's all about before the darkness closes in and extinguishes us We are adrift on a misty grey sea of ignorance seeking a sun kissed island of certainty on which we might hope to find clear answers to our deepest and most poignant questions What is the point of life Why are we here And what is it about us that makes us want to ask these questions As far as we know we're the only species on earth that asks these questions and dares to hope that we might find an answer It seems that we are born to wonder not merely to exist From time to time all of us find ourselves overwhelmed by a sense of awe or mystery often when confronted with the beauty of nature whether it is a mountain stream or the vast expanse of ocean waters That is when we see a flicker of a grander vision of reality perhaps lying beyond the horizons of our experience It is as if for only a moment a veil is removed and we catch a half glimpsed sight of a promised land waiting to be mapped and explored This sense of wonder fuels much of humanity's creativity and its search for understanding

Thinking of Questions Peter Limm, 2015-09-23 This is not a conventional book It is designed to stimulate and challenge all people who are curious to find out about the world they inhabit and their place within it It does this by suggesting questions and lines of questioning on a wide range of topics The book does not provide answers or model arguments but prompts people to create their own questions and a reading log or journal To this end almost all questions have a list of books or articles to provide a starter for stimulating further reading Once you start you will be hooked Never stop questioning

Metaphysics Adrian Pabst, 2012-05-04 This book does nothing less than to set new standards in combining philosophical with political theology Pabst's argument about rationality has the potential to change debates in philosophy politics and religion from the foreword This comprehensive and detailed study of individuation reveals the theological nature of metaphysics Adrian Pabst argues that ancient and modern conceptions of being or individual substance fail to account for the ontological relations that bind beings to each other and to God their source On the basis of a genealogical account of rival theories of creation and individuation from Plato to postmodernism Pabst proposes that the Christian Neo Platonic fusion of biblical revelation with Greco Roman philosophy fulfills and surpasses all other ontologies and conceptions of individuality

Finish the Mission John Piper, David Mathis, 2012-09-30

This is no ordinary missions book The theme isn't new but the approach is refreshing and compelling as contributors David Platt Louie Giglio Michael Ramsden Ed Stetzer Michael Oh David Mathis and John Piper take up the mantle of the Great Commission and its Spirit powered completion From astronomy to exegesis from apologetics to the Global South from being missional at home to employing our resources in the global cause Finish the Mission aims to breathe fresh missionary fire into a new generation as together we seek to reach the unreached and engage the unengaged **Post-Communist**

Malaise Zoran Samardzija, 2020-05-15 Post Communist Malaise examines political modernism within the context of post communist Eastern Europe and the Balkans It focuses on how select cinemas from the regions critique European unification and how they represent related issues like the transition from communism to free market capitalism the Euro crisis and austerity and the rise of nationalism and right wing politics **The Radical Luhmann** Hans-Georg Moeller, 2011-11-08 In The Radical Luhmann Moeller focuses on Luhmann's paradigm shift from philosophy to theory which introduced new perspectives on the contemporary world Boldly breaking with the heritage of Western thought Luhmann denied the central role of humans in social theory particularly the possibility of autonomous agency In this way after Copernicus's cosmological Darwin's biological and Freud's psychological deconstructions of anthropocentrism he added a sociological fourth insult to human vanity A theoretical shift toward complex system environment relations helped Luhmann accidentally solve one of Western philosophy's primary problems mind body dualism By pulling communication into the mix Luhmann finally rendered the Platonic dualist heritage obsolete Moeller's clear presentation opens these formulations to a wide audience and directly relates Luhmannian theory to contemporary issues in democracy art education justice human rights and mass media

What We Are: The Evolutionary Roots of Our Future Lonnie Aarssen, 2022-07-05 Other animals are driven to spend essentially their whole lives just trying to get fed stay alive and get laid That's about it The same was true for our proto human ancestors And modern humans of course also require a Survival Drive and a Sex Drive in order to leave descendants But today we spend most of our lives mainly just trying to convince ourselves that our existence is not absurd In What We Are Queen's University biologist Lonnie Aarssen traces how our biocultural evolution has shaped Homo sapiens into the only creature that refuses to be what it is the only creature preoccupied with a deeply ingrained and absurd sentiment I have a distinct mental life an inner self that exists separately and apart from material life and so unlike the latter need not come to an end This delusion conceivably gave our distant ancestors some wishful thinking for finding some measure of relief from the terrifying uniquely human knowledge of the eventual loss of corporeal survival But this came with an impulsive nagging doubt an obsessive underlying uncertainty self impermanence anxiety Biocultural evolution however was not finished It also gave us two additional uniquely human primal drives both serving to help quell the burden of this anxiety Legacy Drive generates delusional cultural domains for extension of self and Leisure Drive generates pleasurable cultural domains for distraction escape from self Legacy Drive and Leisure Drive Aarssen argues represent two of the most profound

consequences of human cognitive and cultural evolution What We Are advances propositions regarding how a visceral susceptibility to self impermanence anxiety has paradoxically played a pivotal role in rewarding the reproductive success of our ancestors and has thus been a driving force in shaping fundamental motivations and cultural norms of modern humans More than any other milestone in the evolution of human minds self impermanence anxiety and its mitigating Drives for Legacy and Leisure account for not just the advance of civilization over the past many thousands of years but also now its impending collapse Effective management of this crisis Aarssen insists will require a deeper and more broadly public understanding of its Darwinian evolutionary roots as laid out in What We Are *2084 and the AI Revolution, Updated and Expanded Edition* John C. Lennox, 2024-11-26 Will technology change what it means to be human You don t have to be a computer scientist to have discerning conversations about artificial intelligence and technology We all wonder where we re headed Even now technological innovations and machine learning have a daily impact on our lives and many of us see good reasons to dread the future Are we doomed to the surveillance society imagined in George Orwell s 1984 Mathematician and philosopher John Lennox believes that there are credible responses to the daunting questions that AI poses and he shows that Christianity has some very serious sensible evidence based things to say about the nature of our quest for superintelligence This newly updated and expanded edition of 2084 will introduce you to a kaleidoscope of ideas Key recent developments in technological enhancement bioengineering and in particular artificial intelligence Consideration of the nature of AI systems with insights from neuroscience The way AI is changing how we communicate implications for medicine manufacturing and the military its use in advertising and automobiles and education and the future of work How data is used today for surveillance thought control The rise of virtual reality and the metaverse The transhumanist agenda and longtermism The agreements and disagreements that scientists and experts have about the future of AI The urgent need for regulation and control in light of the development of large language transformers like CHATGPT Key insights from Scripture about the nature of human beings the soul our moral sense our future and what separates us from machines In straight forward accessible language you will get a better understanding of the current capacity of AI its potential benefits and dangers the facts and the fiction as well as possible future implications Since the questions posed by AI daunting as they might be affect most of us they demand answers 2084 and the AI Revolution Updated and Expanded Edition has been written to challenge and ignite the curiosity of all readers Whatever your worldview Lennox provides clear information and credible answers that will bring you real hope for the future of humanity *Environmental Change and the World's Futures* Jonathan Paul Marshall, Linda H. Connor, 2015-08-27 Climate change and ecological instability have the potential to disrupt human societies and their futures Cultural social and ethical life in all societies is directed towards a future that can never be observed and never be directly acted upon and yet is always interacting with us Thinking and acting towards the future involves efforts of imagination that are linked to our sense of being in the world and the ecological pressures we experience

The three key ideas of this book ecologies ontologies and mythologies help us understand the ways people in many different societies attempt to predict and shape their futures Each chapter places a different emphasis on the linked domains of environmental change embodied experience myth and fantasy politics technology and intellectual reflection in relation to imagined futures The diverse geographic scope of the chapters includes rural Nepal the islands of the Pacific Ocean Sweden coastal Scotland North America and remote rural and urban Australia This book will appeal to researchers and students in anthropology sociology environmental studies cultural studies psychology and politics

PaintingDigitalPhotography Carl Robinson, 2019-01-29 We live in a digital age where the mediums of art are inextricably bound to the binary code and painting and photography are redefined in their interconnected relationship through digital reconfiguration As digitisation unmoors these mediums from their traditional supports their modes of production display and dissemination shift These changes bring about new ways of creating and engaging with artworks Through this the innate qualities of the mediums previously anchored in their analogue nature are re evaluated through their connection with the digital Born out of the *PaintingDigitalPhotography* conference held at QUAD Derby UK in May 2017 this anthology of essays investigates aspects of interconnectivity between painting digital and photography in contemporary art practices It contributes to critical discourses around networks of associations by examining where syntheses occur and differences remain between these mediums at the beginning of the twenty first century
