Together We March Leah Henderson, 2021-01-19 March through history and discover twenty five groundbreaking protest movements that have shaped the way we fight for equality and justice today in this stunningly illustrated and sweeping book For generations marches have been an invaluable tool for bringing about social change People have used their voices the words on their signs and the strength in their numbers to combat inequality oppression and discrimination They march to call attention to these wrongs and demand change and action from a local to a global scale

Whether demanding protective laws or advocating for equal access to things like voting rights public spaces and jobs the twenty five marches in this book show us that even when a fight seems impossible marching can be the push needed to tip the scales and create a movement This gorgeous collection celebrates this rich and diverse history the often overlooked stories and the courageous people who continue to teach us the importance of coming together to march today *Voices of the Field* Antione D. Tomlin, Sherella Cupid, 2023-07-01 This book *Voices of the Field* DEIA Champions in Higher Education will explore the experiences and stories of Diversity Equity Inclusion and Anti racist DEIA champions and leaders within higher education There is no doubt that in response to the United States current racial climate that higher education institutions have DEIA at the forefront of their operations Consequently as a Black academic or Blackademic educator and DEIA champion I am not sure I always see institutions and organizations walking the walk and doing the work it takes to live up to those missions visions and strategic plans Tomlin 2022 para 1 From our experience this is partly because institutions do not know how to support and encourage all higher education professionals no matter working area gender or race to become more DEIA minded So this book will share stories of champions of DEIA along with how other higher education professionals jump in Like some of our other projects we approach this book from an asset based approach where chapter authors are taking more of an anti deficit approach So while each chapter author will explore the challenges and opportunities that come with being a DEIA champion within higher education we will not focus entirely on what higher education institutions or doing wrong rather how the tools tips and strategies provided can help support current and potential champions of the work and field One especially important contribution of this book is that authors come from many different spaces departments and divisions within higher education including admissions student life curriculum and instruction service learning alumni relations career services intercultural affairs and many others Additionally chapter authors demographics make up a wide range of ages ethnicities abilities and expertise Given the breadth of experiences each chapter will provide poignant suggestions for DEIA champions across the nation as well as for institutions who are looking to better understand advocate for support their own DEIA champions The work of DEI practitioners is a work that often goes unnoticed The long days nights exhaustion and lack of mental capacity due to constant going and potential burnout is the price practitioners pay to fight the fight of creating more equitable spaces Griffin 2021 noted The DEI practitioner is becoming a household name in some industries like education an emerging staple p xxv we agree with Griffin moreover these household names are not getting the attention respect or resources they need to continue being successful in their roles Additionally we add anti racist to DEI as being anti racist is an action We argue it is the action that brings all the other pieces of the work together Its the demonstration and active practice of fighting against racism that helps to shift and change a culture This book will aid in showing all higher education professionals some approaches to being more effective DEIA champions while also taking action and moving more toward anti racism as a mindset and way of being Thus *Voices of the*

Field DEIA Champions in Higher Education is positioned to be a must read for all higher education professionals and institutions who are looking for strategies to support promote and encourage the growth and development of DEIA champions

Learning While Black Janice E. Hale, 2001-12-04 In Learning While Black Janice Hale argues that educators must look beyond the cliches of urban poverty and teacher training to explain the failures of public education with regard to black students Why Hale asks simply are black students not being educated as well as white students Hale goes beyond finger pointing to search for solutions Closing the achievement gap of African American children she writes does not involve better teacher training or more parental involvement The solution lies in the classroom in the nature of the interaction between the teacher and the child And the key she argues is the instructional vision and leadership provided by principals To meet the needs of diverse learners the school must become the heart and soul of a broad effort the coordinator of tutoring and support services provided by churches service clubs fraternal organizations parents and concerned citizens Calling for the creation of the beloved community envisioned by Dr Martin Luther King Jr Hale outlines strategies for redefining the school as the Family and the broader community as the Village in which each child is too precious to be left behind In this book I am calling for the school to improve traditional instructional practices and create culturally salient instruction that connects African American children to academic achievement The instruction should be so delightful that the children love coming to school and find learning to be fun and exciting Janice Hale

Political Religion and Religious Politics David S. Gutterman, Andrew R. Murphy, 2015-10-14

Profound demographic and cultural changes in American society over the last half century have unsettled conventional understandings of the relationship between religious and political identity The Protestant mainline continues to shrink in numbers as well as in cultural and political influence The growing population of American Muslims seek both acceptance and a firmer footing within the nation s cultural and political imagination Debates over contraception same sex relationships and prosperity preaching continue to roil the waters of American cultural politics Perhaps most remarkably the fastest rising religious demographic in most public opinion surveys is none giving rise to a new demographic that Gutterman and Murphy name Religious Independents Even the evangelical movement which powerfully re entered American politics during the 1970s and 1980s and retains a strong foothold in the Republican Party has undergone generational turnover and no longer represents a monolithic political bloc

Political Religion and Religious Politics Navigating Identities in the United States explores the multifaceted implications of these developments by examining a series of contentious issues in contemporary American politics Gutterman and Murphy take up the controversy over the Ground Zero Mosque the political and legal battles over the contraception mandate in the Affordable Health Care Act and the ensuing Supreme Court Hobby Lobby decision the national response to the Great Recession and the rise in economic inequality and battles over the public school curricula seizing on these divisive challenges as opportunities to illuminate the changing role of religion in American public life Placing the current moment into historical perspective and reflecting on the possible future of religion politics and cultural conflict in the United States Gutterman and Murphy explore the cultural and political dynamics of evolving notions of national and religious identity They argue that questions of religion are questions of identity personal social and political identity and that they function in many of the same ways as race sex gender and ethnicity in the construction of personal meaning the fostering of solidarity with others and the conflict they can occasion in the political arena

Access to educational resources has been a tool of liberation for Black Americans from the antebellum period to the present With this book Amber N Wiley emphasizes the value of education as a means for social equality Black Americans wanted the American Dream to apply to them and equal opportunity for quality education was at the forefront of making that dream a reality

Model Schools in the Model City chronicles how Black Washingtonians used public education as a means of racial uplift in the face of entrenched white resistance and repeated assertions of white supremacy For Black Washingtonians it was the school building a permanent structure made of sturdy material that was the physical realization of Black liberation agency and the right to exist as citizens of the United States Furthermore it was the school building that stood as the litmus test to whether Black

Washingtonians citizenship was perpetually guaranteed thus they fought with all the tools at their disposal to maintain access to quality education in the nation's capital. Grieving While Black Breeshia Wade, 2021-03-02 Typically when we reference grief work in relation to anti-Blackness, people think about the grief experienced by those oppressed by white supremacy. But Breeshia Wade encourages those who are not Black to consider how their own unexplored grief amplifies the suffering of Black people. Most of us understand grief as sorrow experienced after a loss: the death of a loved one, the end of a relationship, or a change in life circumstance. Breeshia Wade approaches grief as something that is bigger than what's already happened to us; as something that is connected to what we fear, what we love, and what we aspire toward. Drawing on stories from her own life as a Black woman and from the people she has midwived through the end of life, she connects sorrow not only to specific incidents but also to the ongoing trauma that is part and parcel of systemic oppression. Wade reimagines our relationship to power, accountability, and boundaries and points to the long-term work we must all do in order to address systemic trauma perpetuated within our interpersonal relationships. Each of us has a moral obligation to attend to our own grief so that we can responsibly engage with others. Wade elucidates grief in every aspect of our lives, providing a map back to ourselves and allowing the reader to heal their innate wholeness.

A Black Woman for President Dianna N. Watkins-Dickerson, 2025-10-24 Throughout US history, only three Black women—Shirley Chisholm, Carol Moseley Braun, and Kamala Harris—have given successfully recognized bids for the office of president of the United States. In *A Black Woman for President*, author Dianna N. Watkins-Dickerson uses womanist rhetorical criticism to analyze the presidential announcement speeches of Congresswoman Shirley Chisholm, Ambassador Carol Moseley Braun, and then Senator Kamala Harris. In close readings of each candidate's speeches, Watkins-Dickerson defines womanist rhetorical theory and its efficacy for researching Black female voices in the field of communication in general and the presidential announcement speeches of Black women specifically. Beginning with Shirley Chisholm's historic 1972 campaign as the first Black woman to run a viable campaign for the US presidency, the volume analyzes how Chisholm's speech set a precedent for

future generations of Black women in politics by boldly asserting her right to lead despite the multiple barriers of race and gender The study then moves to Carol Moseley Braun's 2004 presidential announcement exploring how Braun's speech navigated the intersections of identity representation and political ambition during a time when Black women in the Senate were still a rarity Finally the analysis culminates with Kamala Harris's 2020 presidential bid focusing on how her rhetoric blended elements of Black feminist resistance and national unity in an era of heightened political and racial division The volume highlights the ways in which Chisholm Braun and Harris drew upon their lived experiences and cultural legacies to construct powerful transformative narratives and argues that their speeches not only expanded the boundaries of political discourse but also reimagined the possibilities for leadership in America Ultimately this study provides a rich interdisciplinary framework for understanding how Black women have reshaped the political landscape through the power of their words
