An Approach to Multi-agent Systems as a Generalized Multi-synchronization Problem Rafael Martínez-Guerra, Juan Pablo Flores-Flores, 2023-03-09 This book addresses the problem of multi agent systems considering that it can be interpreted as a generalized multi synchronization problem. From manufacturing tasks through encryption and communication algorithms to high precision experiments the simultaneous cooperation between multiple systems or agents is essential to successfully carrying out different modern activities both in academy and industry. For example the coordination of multiple assembler robots in manufacturing lines. These agents need to synchronize. The first two chapters of the book describe the synchronization of dynamical systems paying special attention to the synchronization of non identical systems. Following the third chapter presents an interesting application of the synchronization phenomenon for state estimation. Subsequently the authors fully address the multi agent problem interpreted as multi synchronization. The final chapters introduce the reader to a more complex problem the synchronization of systems governed by partial differential equations both of integer and

fractional order The book aimed at graduates postgraduate students and researchers closely related to the area of automatic control Previous knowledge of linear algebra classical and fractional calculus is requested as well as some fundamental notions of graph theory **Cybersecurity** Ahmed A. Abd El-Latif,Christos Volos,2022-03-25 This book presents techniques and security challenges of chaotic systems and their use in cybersecurity It presents the state of the art and the latest discoveries in the field of chaotic systems and methods and proposes new models practical solutions and technological advances related to new chaotic dynamical systems The book can be used as part of the bibliography of the following courses Cybersecurity Cryptography Networks and Communications Security Nonlinear Circuits Nonlinear Systems and Applications
