students the confidence to apply concepts to their own practice Skills for Using Theory in Social Work James A. Forte, 2014-02-05 Using theory research evidence and experiential knowledge is a critical component of good social work. This unique text is designed to help social work students and practitioners to integrate theorizing into practice demonstrating how to search for, select and translate academic knowledge for practical use in helping people improve their lives and environments. Presenting 32 core skills, *Skills for Using Theory in Social Work* provides a conceptual foundation, a vocabulary and a set of skills to aid competent social work theorizing. Each chapter outlines the knowledge and action components of the skill and its relationship to core practice behaviours along with learning and reflection activities. The lessons are divided into four parts. Section one discusses foundational material including self-identification as a theorist/practitioner, the deliberate use of the term theory and a social work approach to the selection of knowledge. Section two focuses on the adept use of theorizing skills. It covers identifying assumptions, using concepts, formulating propositions, organizing theory elements inductively or deductively, summarizing and displaying the elements of a theory, gathering and organizing assessment information and communicating with clients and colleagues about tentative theories. Section three includes lessons preparing social workers for the construction of useful middle-range theories including causal theories and interpretive theories and for testing and sharing these practical theories. Section four presents skills to develop critical thinking about theoretical knowledge. These include avoiding the misuse of theory, judging a theory using scientific standards, judging a theory by professional standards, critiquing theory in its cultural and historical context and making judgments about the likely long-term impact of a theory. This key text will help readers to demonstrate their expertise in reflective, competent and theory-informed practice. It is suitable for all social work students and practitioners, particularly those taking practice theory and human behaviour in the social environment courses.

Mastering Concept-Based Teaching and Competency Assessment - E-Book Jean Foret Giddens, 2022-12-20 Selected for 2025 Doody's Core Titles in Education. Learn how to develop and implement a successful concept-based curriculum and competency assessment. Written specifically for nursing faculty by thought leader Jean Giddens, *Mastering Concept-Based Teaching and Competency Assessment*, 3rd Edition, provides the understanding and expertise you need to make the transition from traditional content-focused instruction to a conceptual approach to teaching and learning and from knowledge assessment to competency assessment. New to this edition is a new chapter on differentiating concept-based and competency-based approaches. A perfect complement to Giddens' student-oriented textbook *Concepts for Nursing Practice*, this book is ideal for both undergraduate and graduate faculty and also serves as a helpful study tool for faculty preparing for the Certified Nurse Educator exam. Framework for a concept-based curriculum (CBC) begins with an overview of the conceptual approach and then discusses the steps used in developing a CBC using concepts as the infrastructure for the curriculum. Strong foundation in how to teach within a CBC examines the nature of concepts, their function in the process of learning and the importance of being

consistent in the selection and implementation of concepts. Balanced teaching strategies engage students with an open environment and learning activities demonstrating the application of information to multiple situations. Success evaluation criteria explain the importance of analyzing evaluation data to measure the achievement of student learning and for evaluating a CBC program. Misconceptions and Clarifications boxes reflect the latest research in conceptual learning to help clarify important concepts. NEW Differentiating Concept Based and Competency Based Approaches chapter explains the close interrelationship of concepts and competencies. NEW Updated content reflects the latest evidence and literature on the conceptual approach and the application of competencies within the conceptual approach. NEW Improved graphic design and layout makes the content more visually appealing and promotes understanding.

Nursing Theory, Postmodernism, Post-structuralism, and Foucault Olga Petrovskaya, 2022-09-30. Nursing Theory Postmodernism Post structuralism and Foucault critiques mainstream American nursing theory and its use of post structural theory comparing and contrasting how postmodern and post structural ideas have been used fruitfully in nursing research and theorizing elsewhere. In the late 1980s references to post structuralism and Michel Foucault started to appear in nursing journals. Since then hundreds of nursing publications have cited postmodernism and key post structural ideas such as power knowledge discourse and de centring the human subject. In *Nursing Theory Postmodernism Post structuralism and Foucault* Olga Petrovskaya argues that the application of these ideas is markedly different in American nursing theory scholarship compared to nursing theoretical scholarship generated outside the canon of unique nursing theory. Analysing relevant literature from the late 1980s through 2010s she demonstrates this difference arguing that American nursing theory calcified into a matrix of dogmas built on logical positivism wary of borrowed theory and loyal to a unique nursing science. Post structural ideas that fit the matrix such as criticism of medicine are sanctioned whereas ideas sceptical of humanistic agendas including those that challenge American nursing theory are rendered meaningless. In contrast other nurse scholars from Britain Australia Canada and what the author calls the American enclave group engaged with postmodern and post structural perspectives to enrich their research and invite readers to rethink nursing practice. The book showcases examples of their intelligent creative theorizing. Arguing that American nursing theory enervated nursing theorizing Petrovskaya calls for opening this matrix to theoretical and methodological creativity less rigid categories of scholarship and healthy self examination. Making the case that post structural ideas are vital for nurses ability to critically reflect on their discipline and profession this is a necessary read for all those interested in nursing theory philosophy and praxis.
