Researching the Military Helena Carreiras, Celso Castro, Sabina Frederic, 2016-03-02 Researching the Military focuses on the experiences of researchers who study the military around the world. It explores the historical, social, institutional, and personal factors that frame research and scrutinize the way knowledge in this area impacts society and policy. More than merely analyzing research experiences yet necessarily including them, it is also about the experiences of researchers, their position with regard to the object of their studies, the institutional context where they work, and the way their research impacts the academic and policy making fields in the respective countries. The common theme to the various chapters is reflexivity, a conscious effort at addressing the conditions of research and the position of the researcher and the research participants in that interface. By collecting diverse experiences of researchers from across the world, this volume aims to enhance reflexivity in the field of military studies and to encourage the exchange of knowledge between the academic field and the military arena. This book will be of much interest to students of military studies, research methods, sociology, social anthropology, and security studies in general.

Sociology in South Africa R. Sooryamoorthy, 2016-08-13 This book is the first comprehensive account of the history and current state of South African sociology. Providing a holistic picture of the subject both as it is taught in universities and as a field of research, it reveals the trajectories of a discipline in a challenging socio-political context. With the support of historical and scientometric data, it demonstrates how the changing political situation from colonialism to apartheid to democracy has influenced the nature, direction, and foci of sociological research in the country. The author shows how during the apartheid era, sociology was professionally fragmented and divided along language and race lines. It was, however, able to flourish with the advent of democracy in 1994 and has become a unique academic movement. This insightful work will appeal to students and scholars of the social sciences and all those interested in the history and society of South Africa.

The Handbook of African Defence and Armed Forces Evert Kleynhans, Marco Wyss, 2025-03-01 The Handbook of African Defence and Armed Forces provides the first in-depth and multifaceted analysis of the evolution and current state of national defence policies, strategies, doctrines, capabilities, security challenges, and strategic responses of African states and their armed forces. Geographically, these aspects are investigated at the national, sub-regional, and regional levels. Chronologically, they are analysed against the backdrop of the superpower withdrawal from the continent in the 1990s and the so-called New Scramble for Africa, which has seen a crescendo of renewed great power interest in the continent's resources as well as its strategic role, location, and relevance since the 2000s. The book takes a bottom-up and African-centric approach and is organized around five key themes: i) the differing security outlooks and defence policies of African powers within the region and the different sub-regions; ii) the strategies, doctrines, transformation, and employment of African armed forces; iii) the relationship between African armed forces with sub-regional, regional, and international organizations; iv) the challenges that African states and their armed forces have been facing and their strategic responses; and

v the position of African perspectives and agency in the context of continental and international security and defence Understanding African security and defence especially in terms of each individual nation s ability to contribute to peacekeeping operations counterterrorism border security and internal security requires a focus on the national level of armed forces and defence policies this in turns sheds light on sub regional and regional divergences challenges and cooperation Based on this framework the chapters in this volume offer comprehensive African perspectives on African and international security and defence and in doing so show the agency of the continent s countries and armed forces in International Security and Relations

The Economics of Defense Industry Thomas-Durell Young, 2023-10-17 This book on the economics of defence industry assesses a series of historical and contemporary case studies that consistently demonstrate the need for governments to recognise and thereafter factor the financial needs of a narrow industrial sector that is capital intensive technologically advanced and that requires a highly skilled labour force Since the end of the cold war Western governments have systematically reduced financial support to their domestic defence industry and have seemingly ignored planning and funding industrial mobilisation In all cases government policy has been to encourage industries to consolidate capacity to

become financially viable in a sector that has seen diminished demand The 2022 Russian invasion of Ukraine has caused Western governments to reassess their previous assumptions Efforts to increase industrial capacity have been met with the iron laws of economics whereby businesses need to show return on investments The chapters in this volume posit that efforts to rationalise industrial capacity and innovation to meet short term financial efficiencies inevitably results in limited expensive and long delays in increased production in times of international crisis This book serves as an essential guide for academics researchers and students interested in defence economics industrial economics international relations and industrial policy The chapters in this book were originally published in various issues of Defense Security Analysis
