Moore,Matthew D. Neal,Ernest E. Moore,2020-10-12 The first edition of this publication was aimed at defining the current concepts of trauma induced coagulopathy by critically analyzing the most up to date studies from a clinical and basic science perspective It served as a reference source for any clinician interested in reviewing the pathophysiology diagnosis and management of the coagulopathic trauma patient and the data that supports it By

meticulously describing the methodology of most traditional as well as state of the art coagulation assays the reader is provided with a full understanding of the tests that are used to study trauma induced coagulopathy With the growing interest in understanding and managing coagulation in trauma this second edition has been expanded to 46 chapters from its original 35 to incorporate the massive global efforts in understanding diagnosing and treating trauma induced coagulopathy The evolving use of blood products as well as recently introduced hemostatic medications is reviewed in detail The text provides therapeutic strategies to treat specific coagulation abnormalities following severe injury which goes beyond the first edition that largely was based on describing the mechanisms causing coagulation abnormalities Trauma Induced Coagulopathy 2nd Edition is a valuable reference to clinicians that are faced with specific clinical challenges when managing coagulopathy
