

1. A scientist is investigating a new treatment for a disease that affects thousands of people. Many people with this disease volunteer to be part of her study. Which of the following is an ethical concern that the scientist must address before conducting her study?
- A. The scientist must ensure that the treatment will be effective.
  - B. The scientist must ensure that the study's results will not be shared with other scientists.
  - C. The scientist must inform the volunteers about the potential dangers of participating in the study.
  - D. The scientist must demonstrate the treatment on him or herself.
