* The 2000-point scale Renaissance Learning has created above is a transformation of a book's ATOS level to a scale that is similar—but not identical—to the Lexile scale. The transformation was derived by analyzing ATOS and Lexile data on more than 19,000 books. ATOS measures are based on four characteristics of the book (average sentence length, average word length, vocabulary grade level, and the number of words in the book), while Lexile measures are based on two (sentence length and word frequency).

Because Lexile uses fewer characteristics to estimate the reading difficulty level of a book, Renaissance Learning would expect Lexile to be somewhat less accurate than ATOS. The 2000-point scale information should be useful to anyone who is accustomed to using Lexiles, because its values will be reasonable approximations in most cases.
