The Golden Thread Fuad Udemans, 2013-09-23 This book is an account of a ten year experiment whereby the scientist became an entrepreneur so as to experience his own theoretical model applied in a live social system society Profit motives and the clinical nature of science became muddled with norms rules and laws of social systems and how different people applied and responded to

these rules The insights to be gained from this journey are often surprising The book highlights many counter intuitive outcomes It also reveals how certain individuals interpret societys rules and norms despite their design to ensure fair and equitable social systems Indeed the manipulation of social laws and standards by those with strong fields of power is self evident and it is explored in a unique manner Understanding how the field of power can be manipulated suggests that no matter how bleak ones current position may be it is very possible and relatively easy to escape conditions of poverty oppression and subjugation vital issues that citizens in all countries face today **The Journal of the Institution of Engineers, Australia** Institution of Engineers Australia,1964 *Mustererkennung 1984* W.
